

Šiame faile yra pateiktas atminties naudojimas skitingų dydžių failų veikimo atsišvelgiant į skirtinges stragegijas

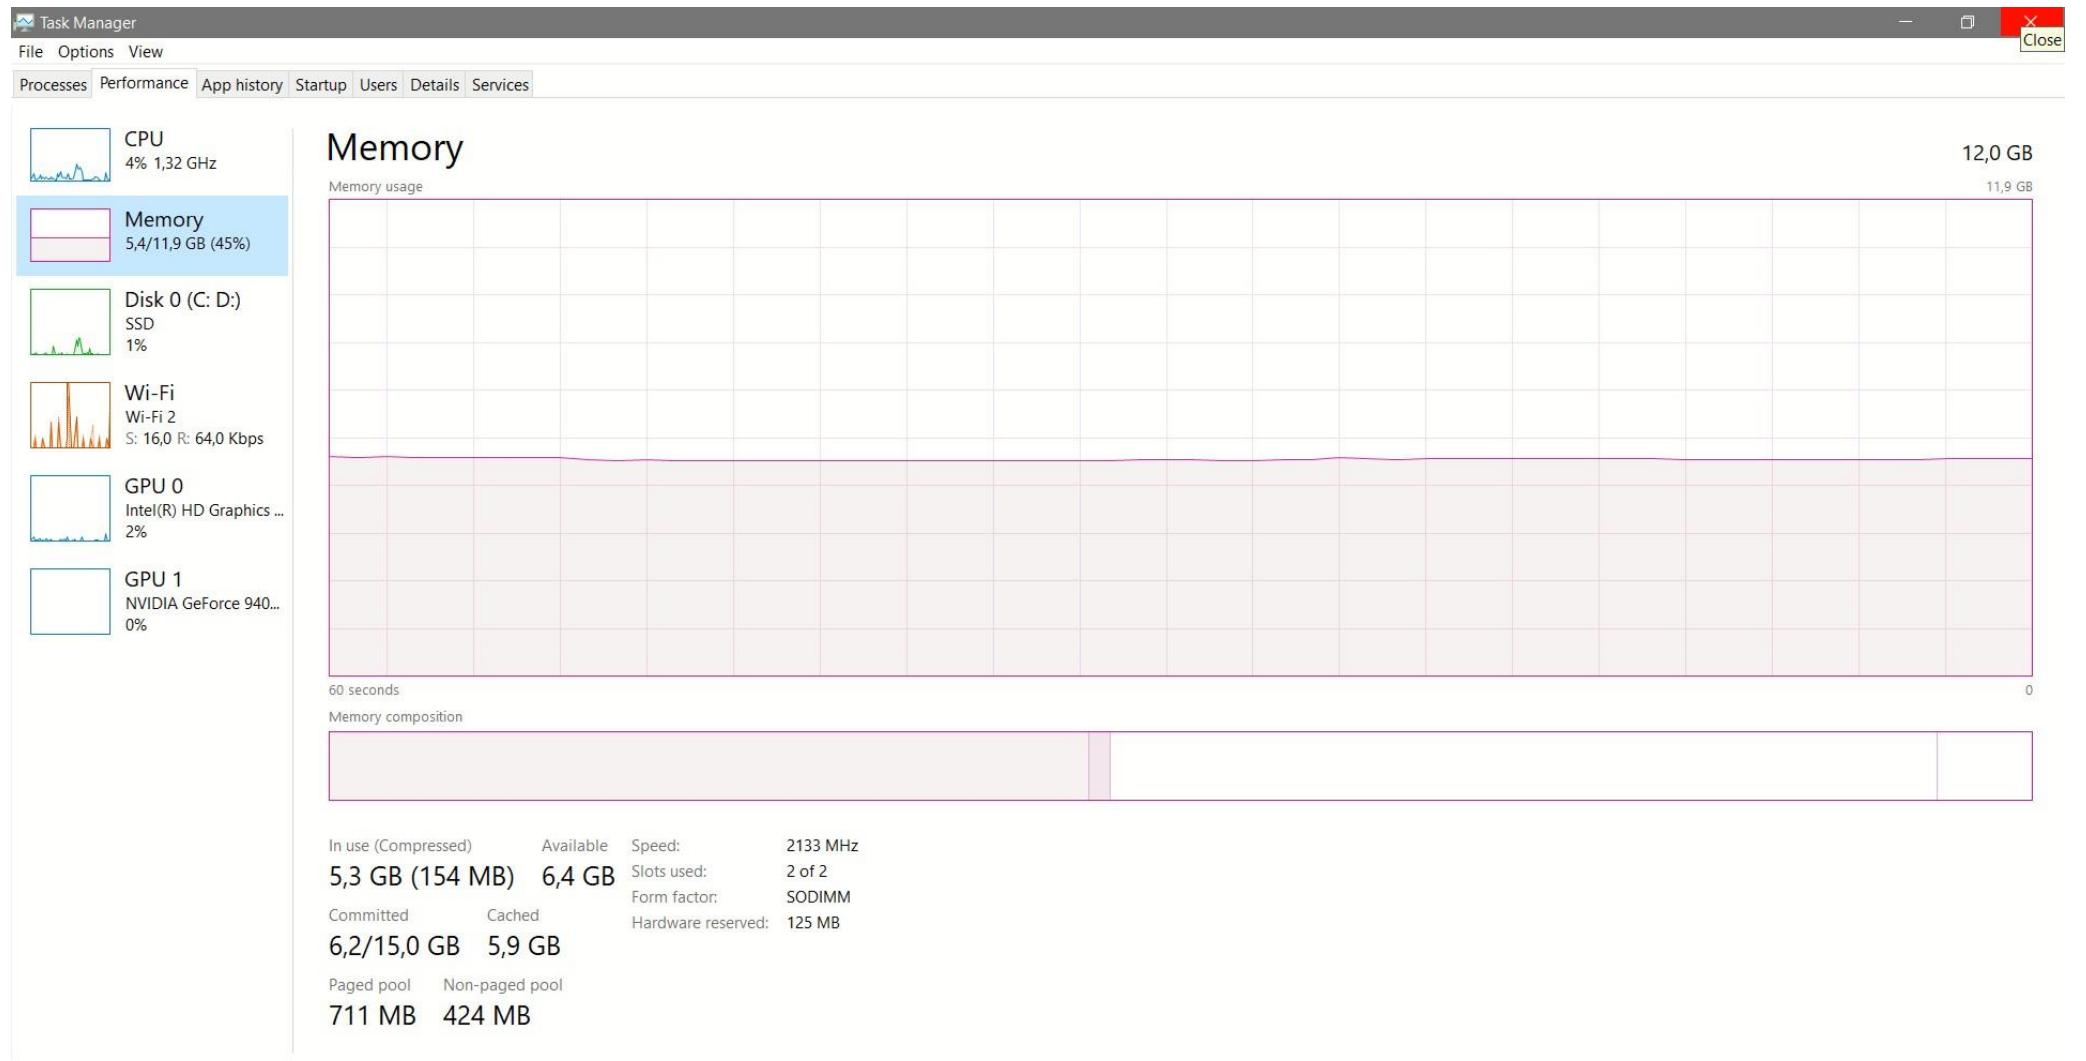

I startegija, failas su 1000 studentų naudojant std::vector

II startegija, failas su 1000 studentų naudojant std::vector

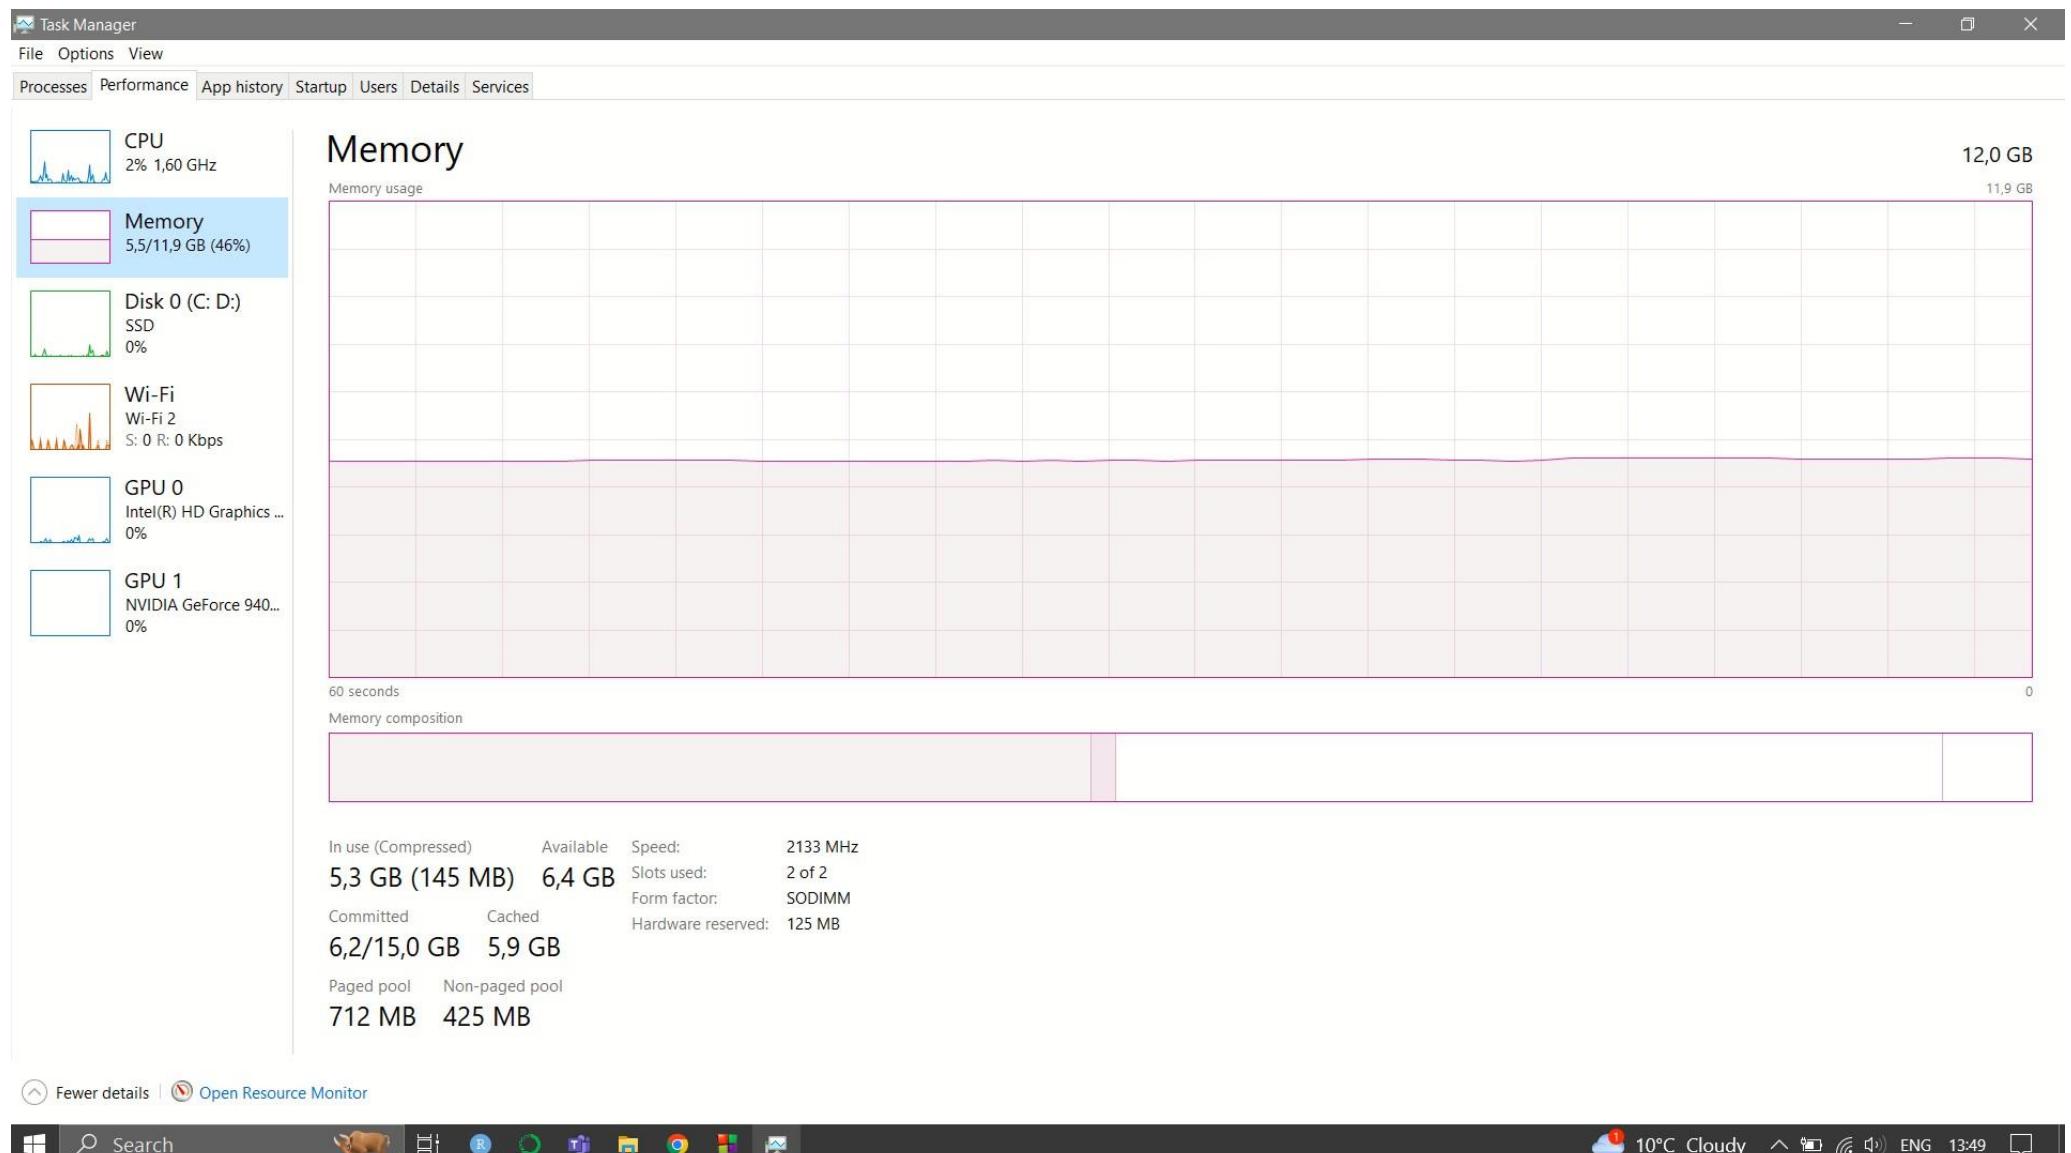

III startegija, failas su 1000 studentų naudojant std::vector

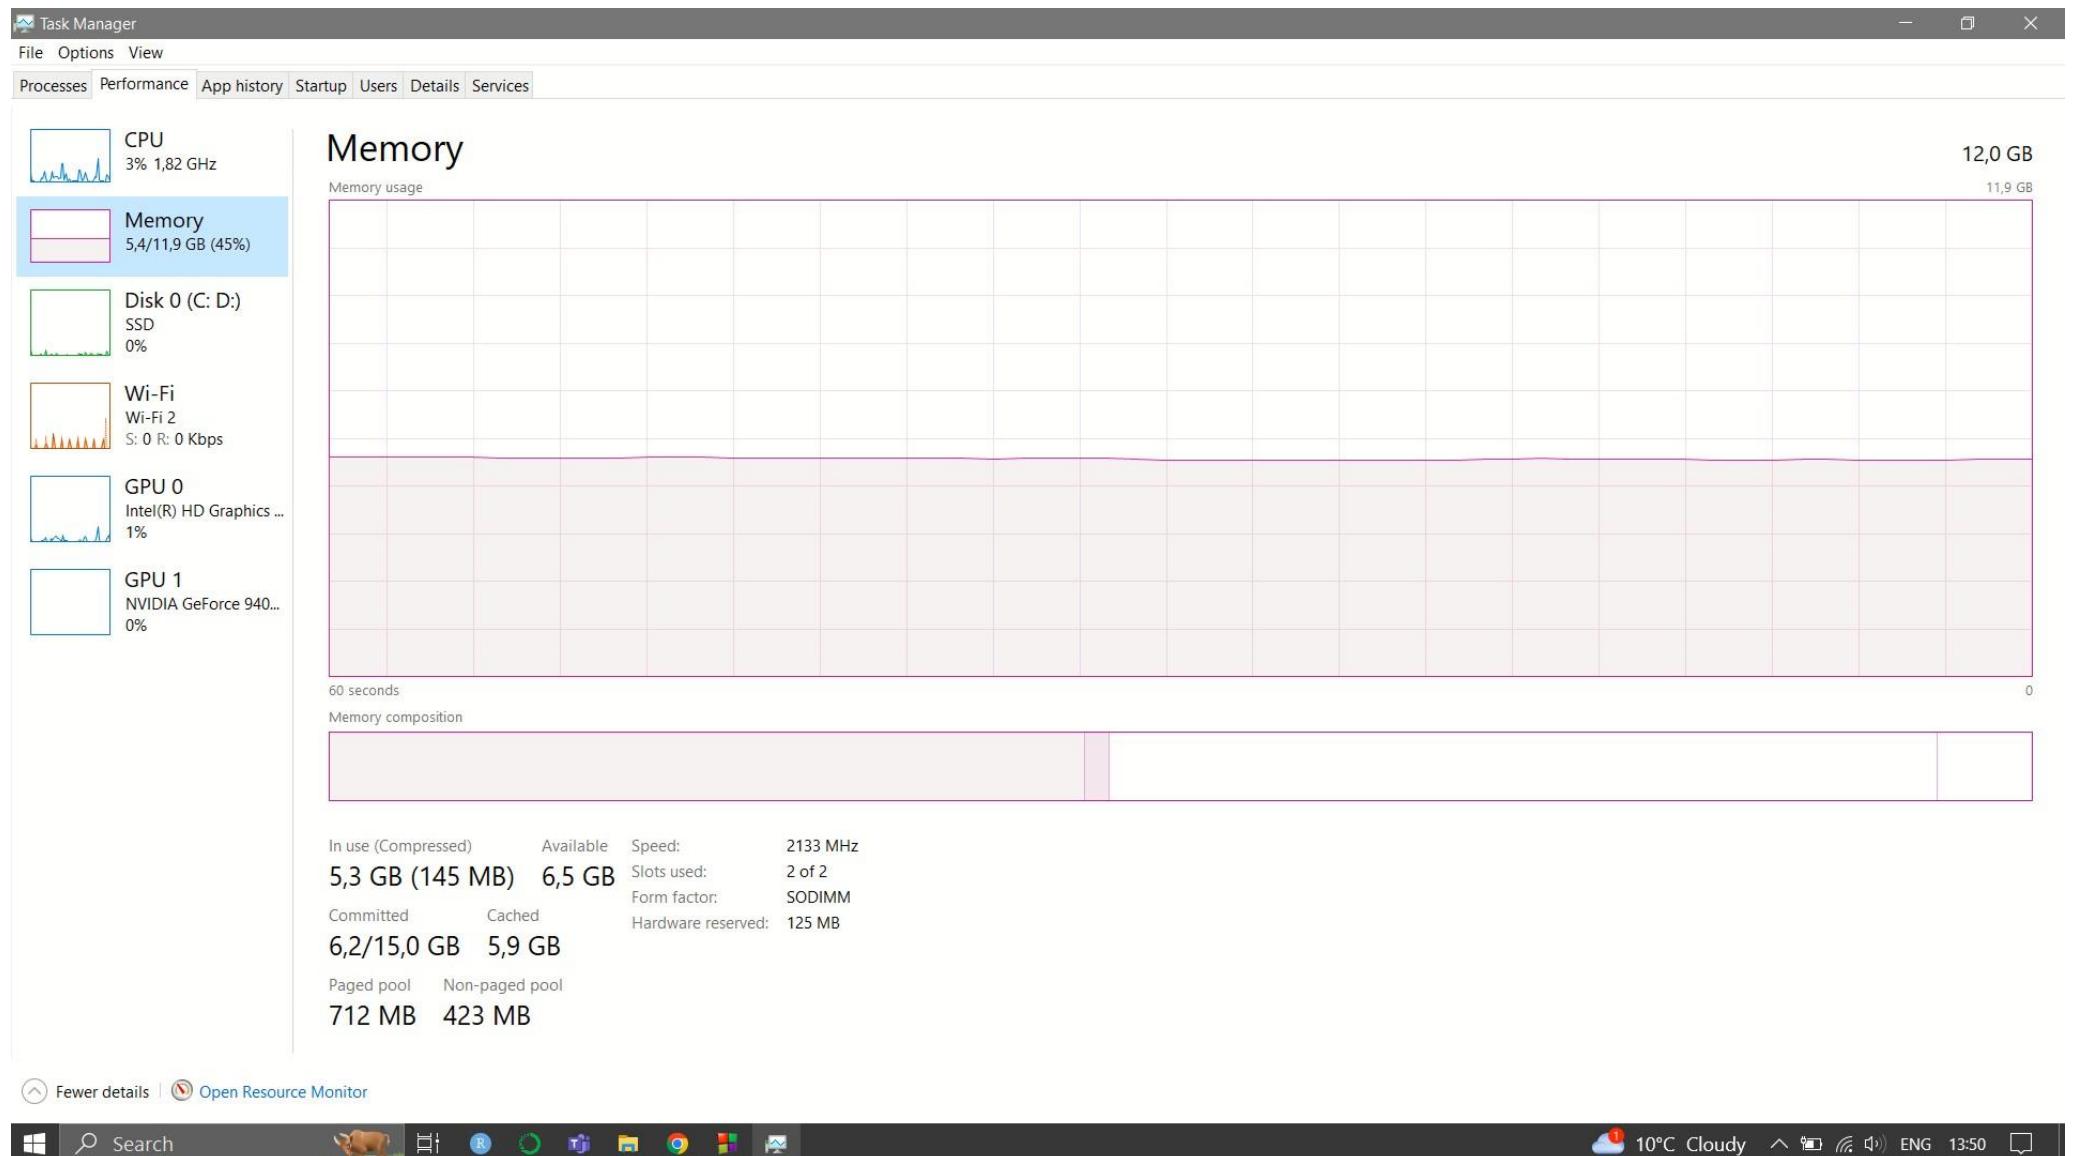

I startegija, failas su 1000 studentų naudojant std::list

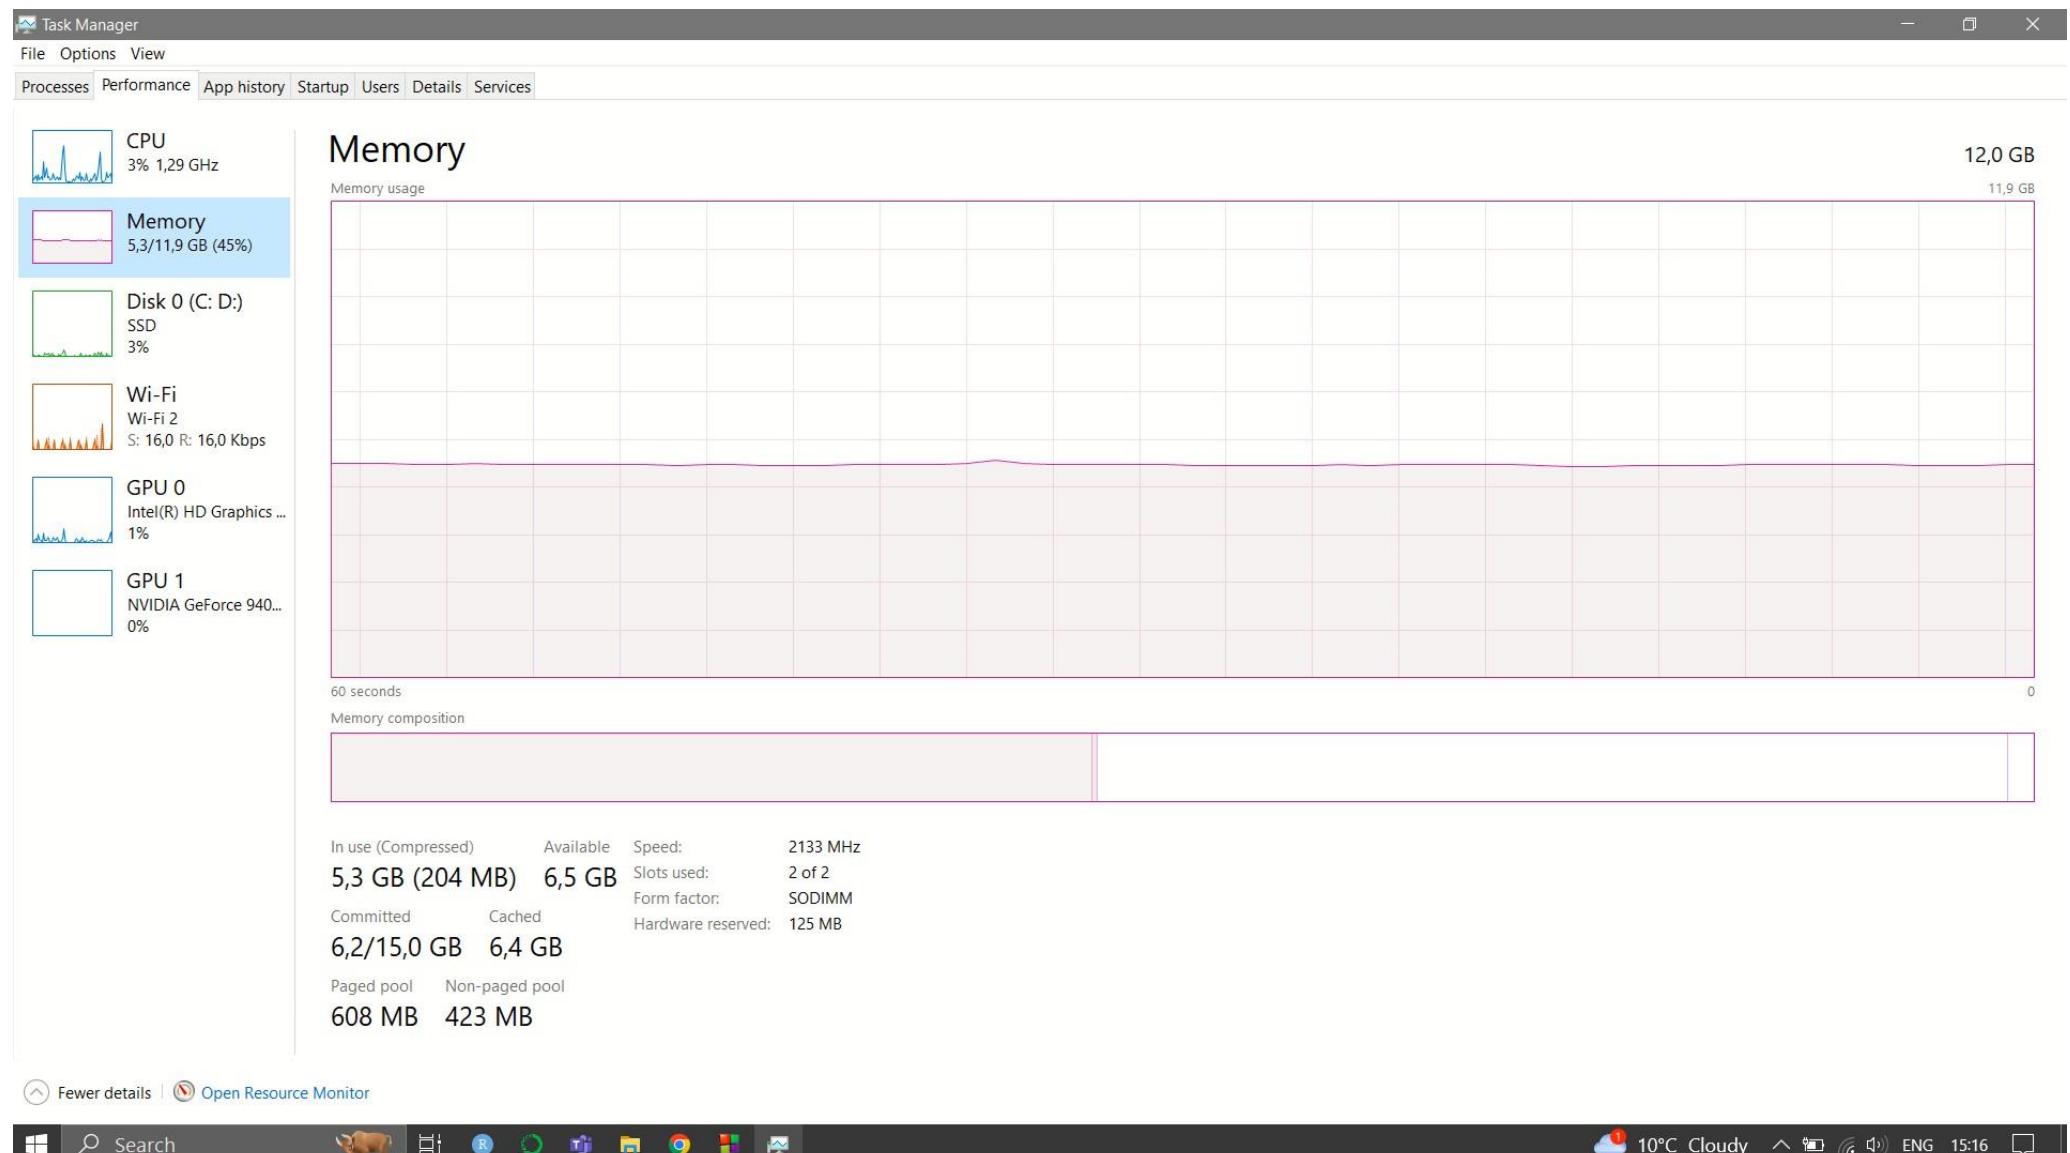

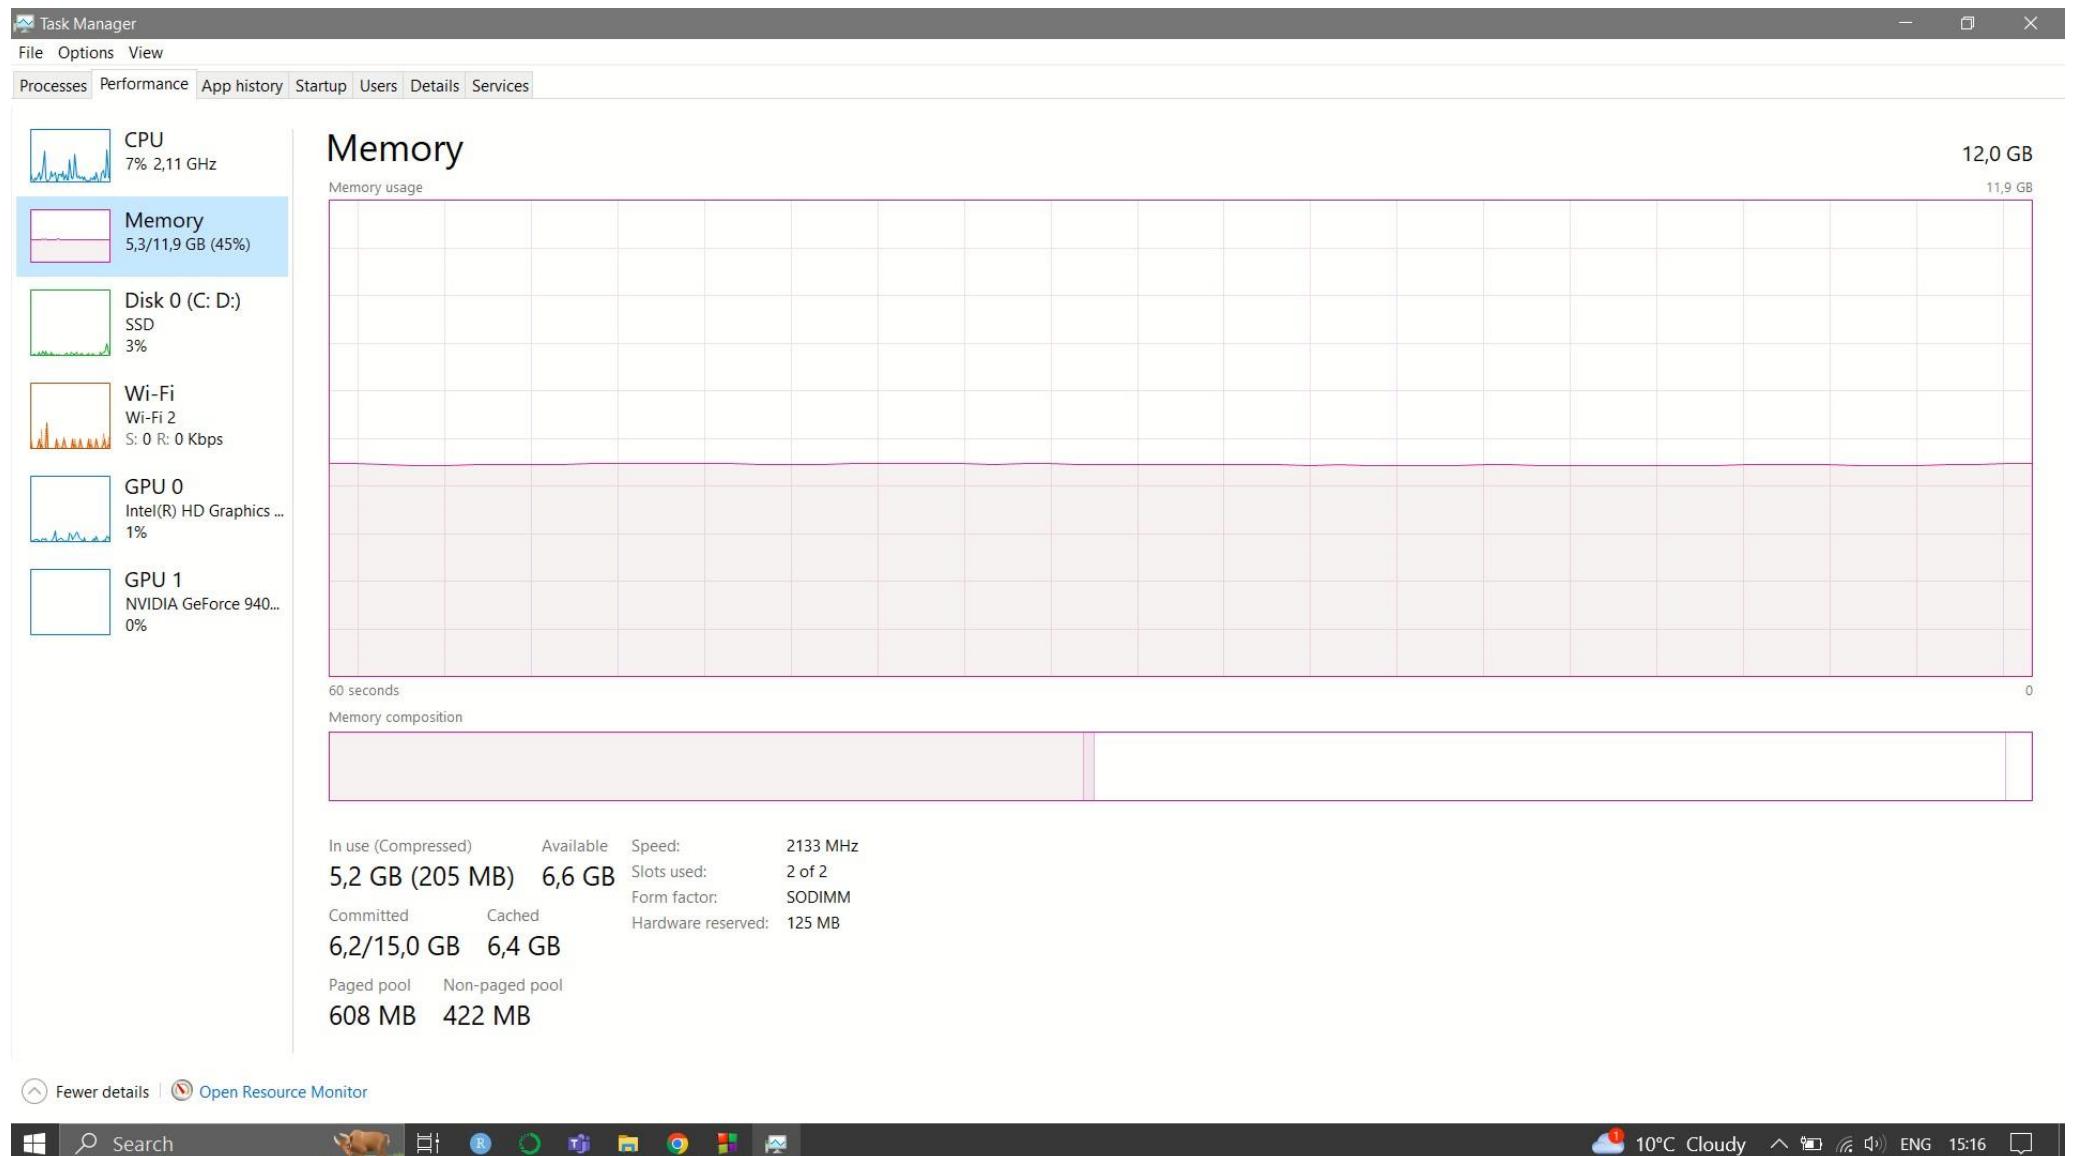

II startegija, failas su 1000 studentų naudojant std::list

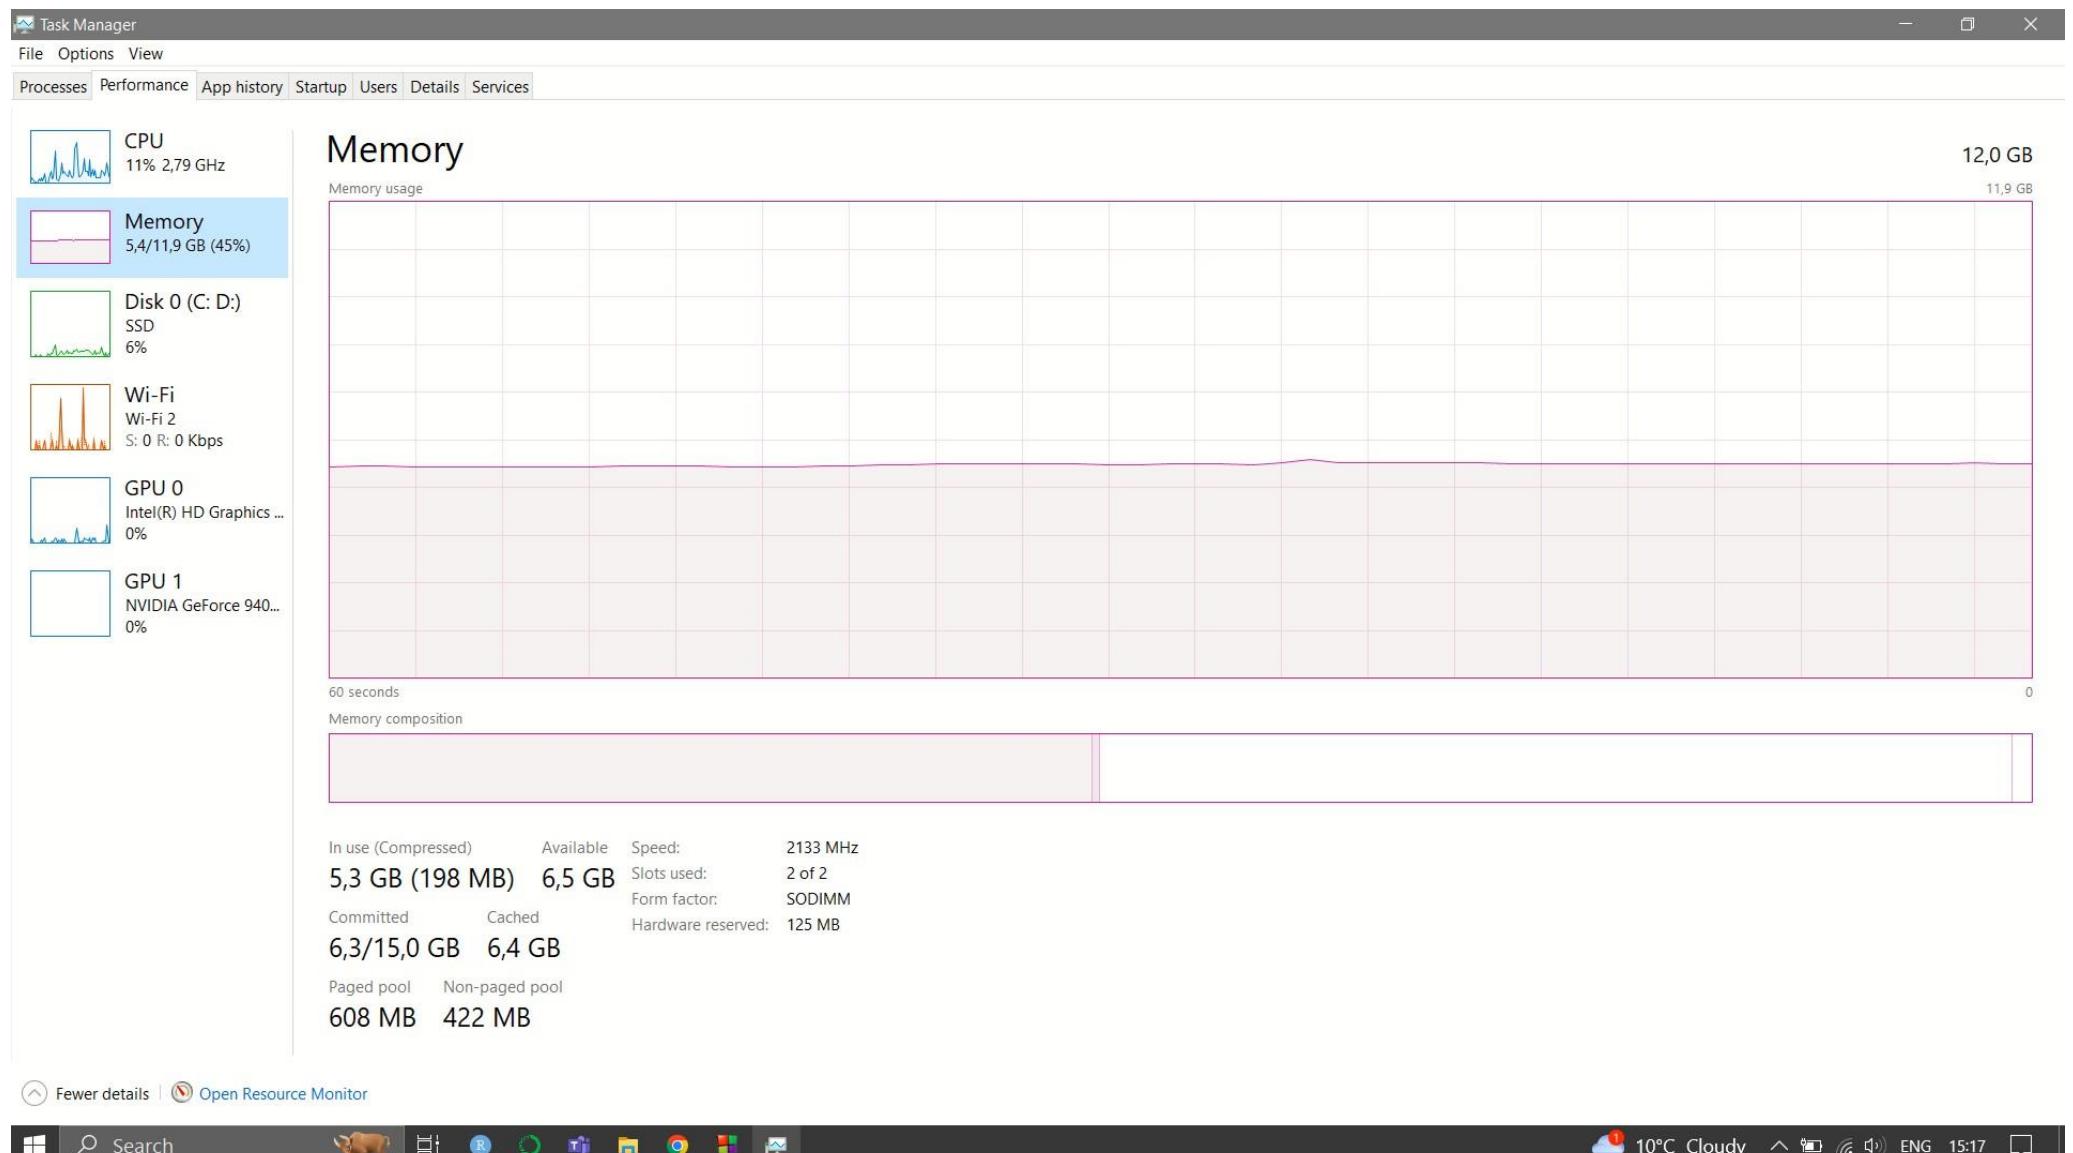

III startegija, failas su 1000 studentų naudojant std::list

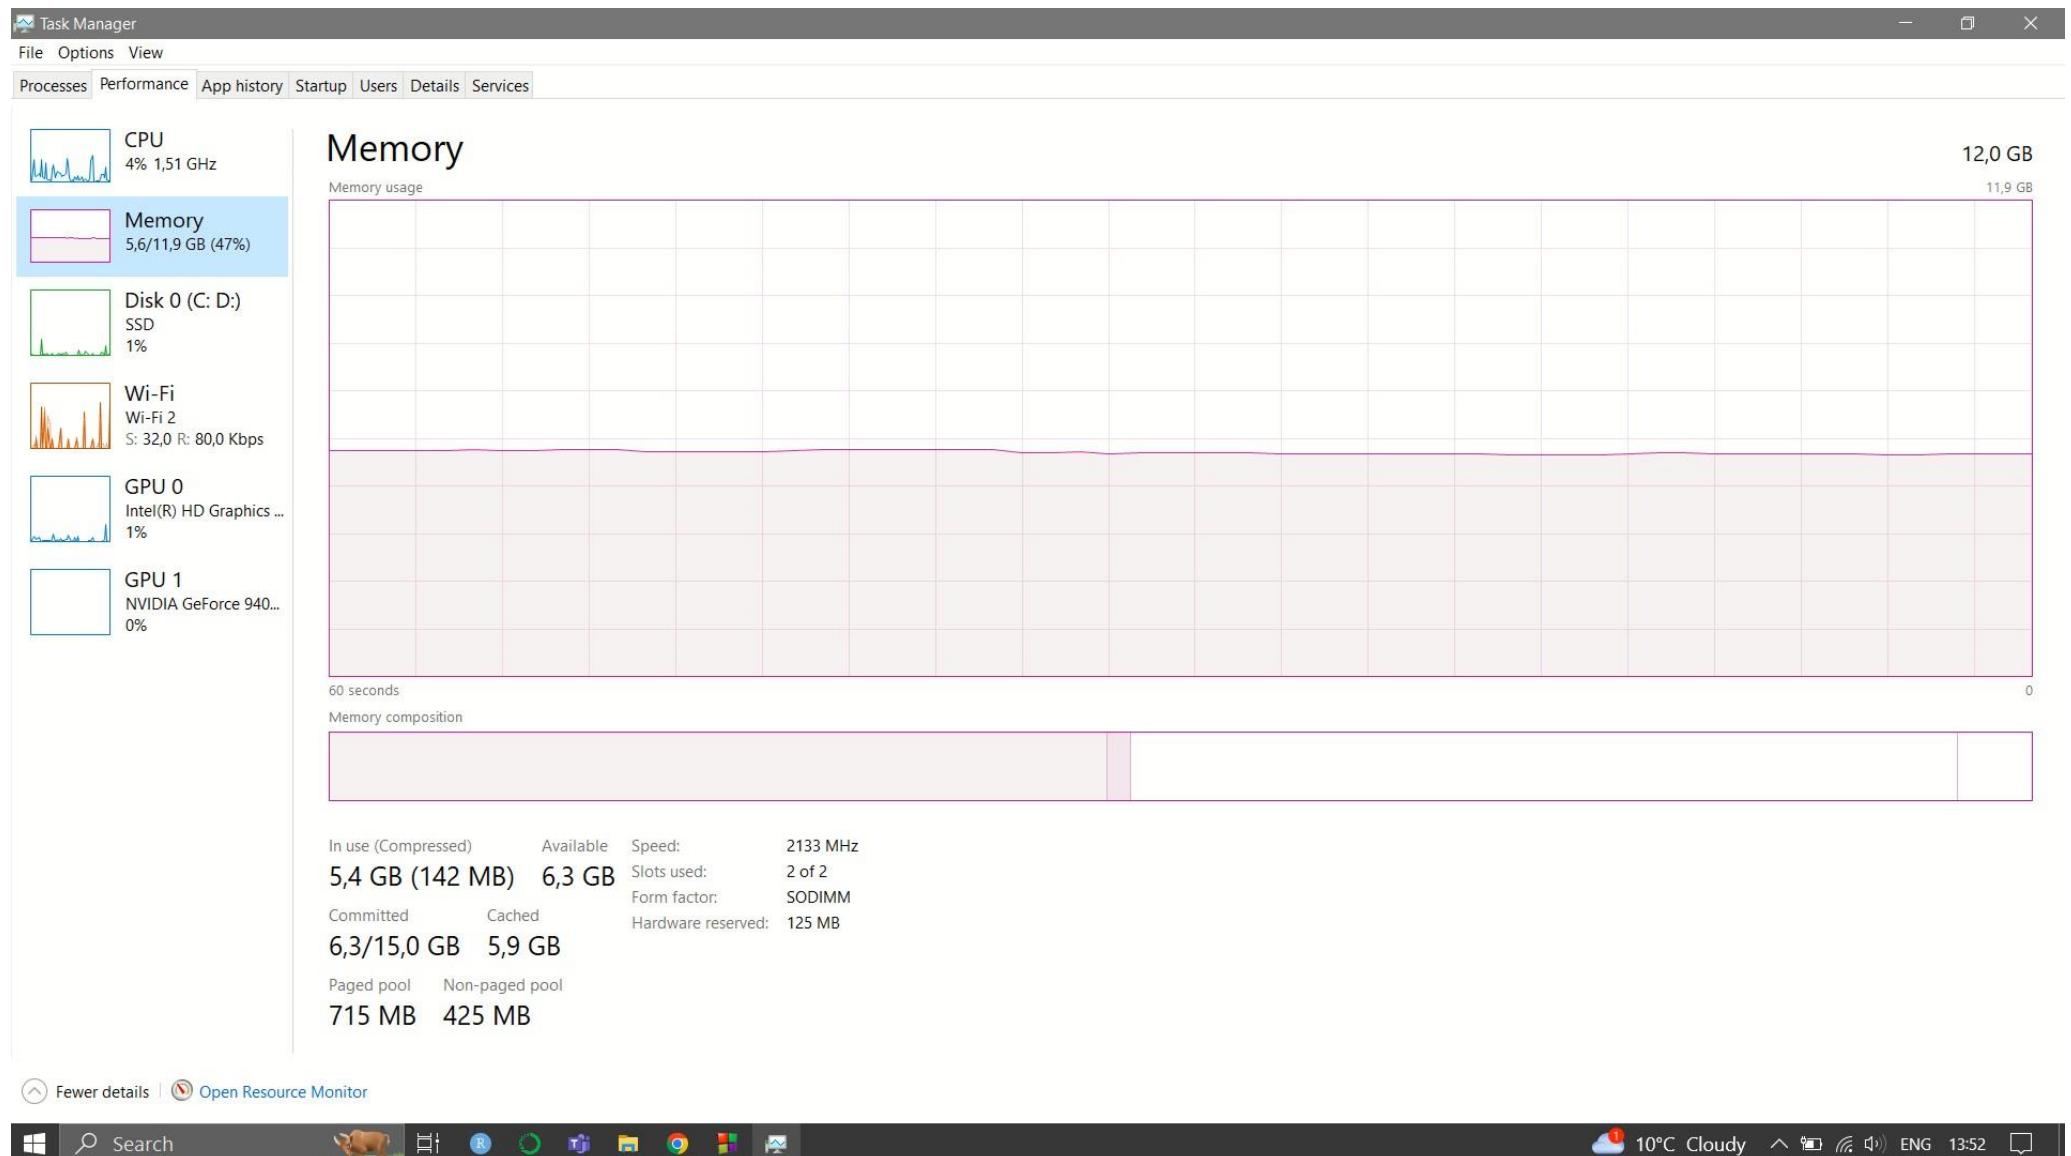

I startegija, fajlas su 10000 studentu naudojant std::vector

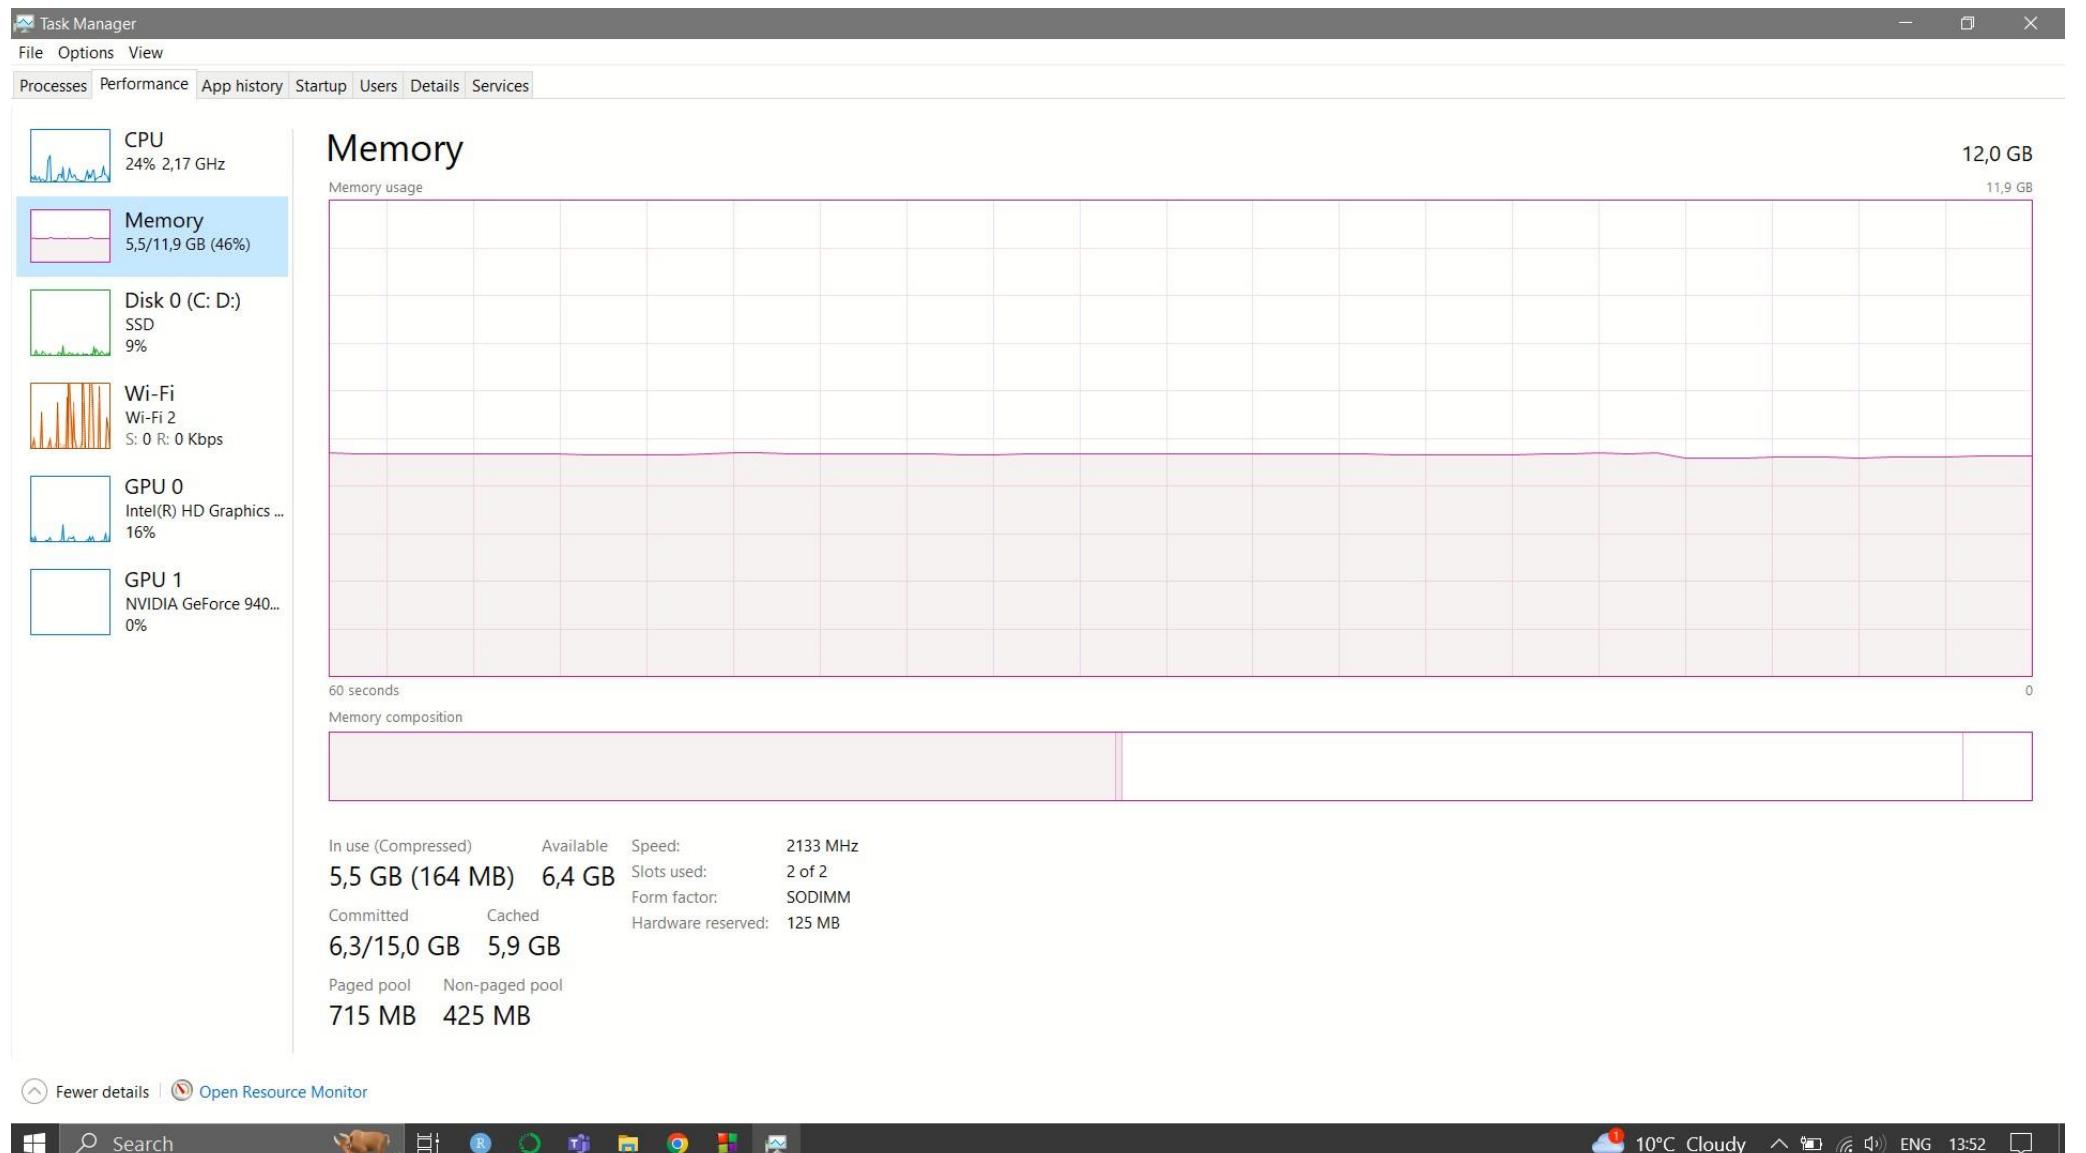

II startegija, failas su 10000 studentų naudojant std::vector

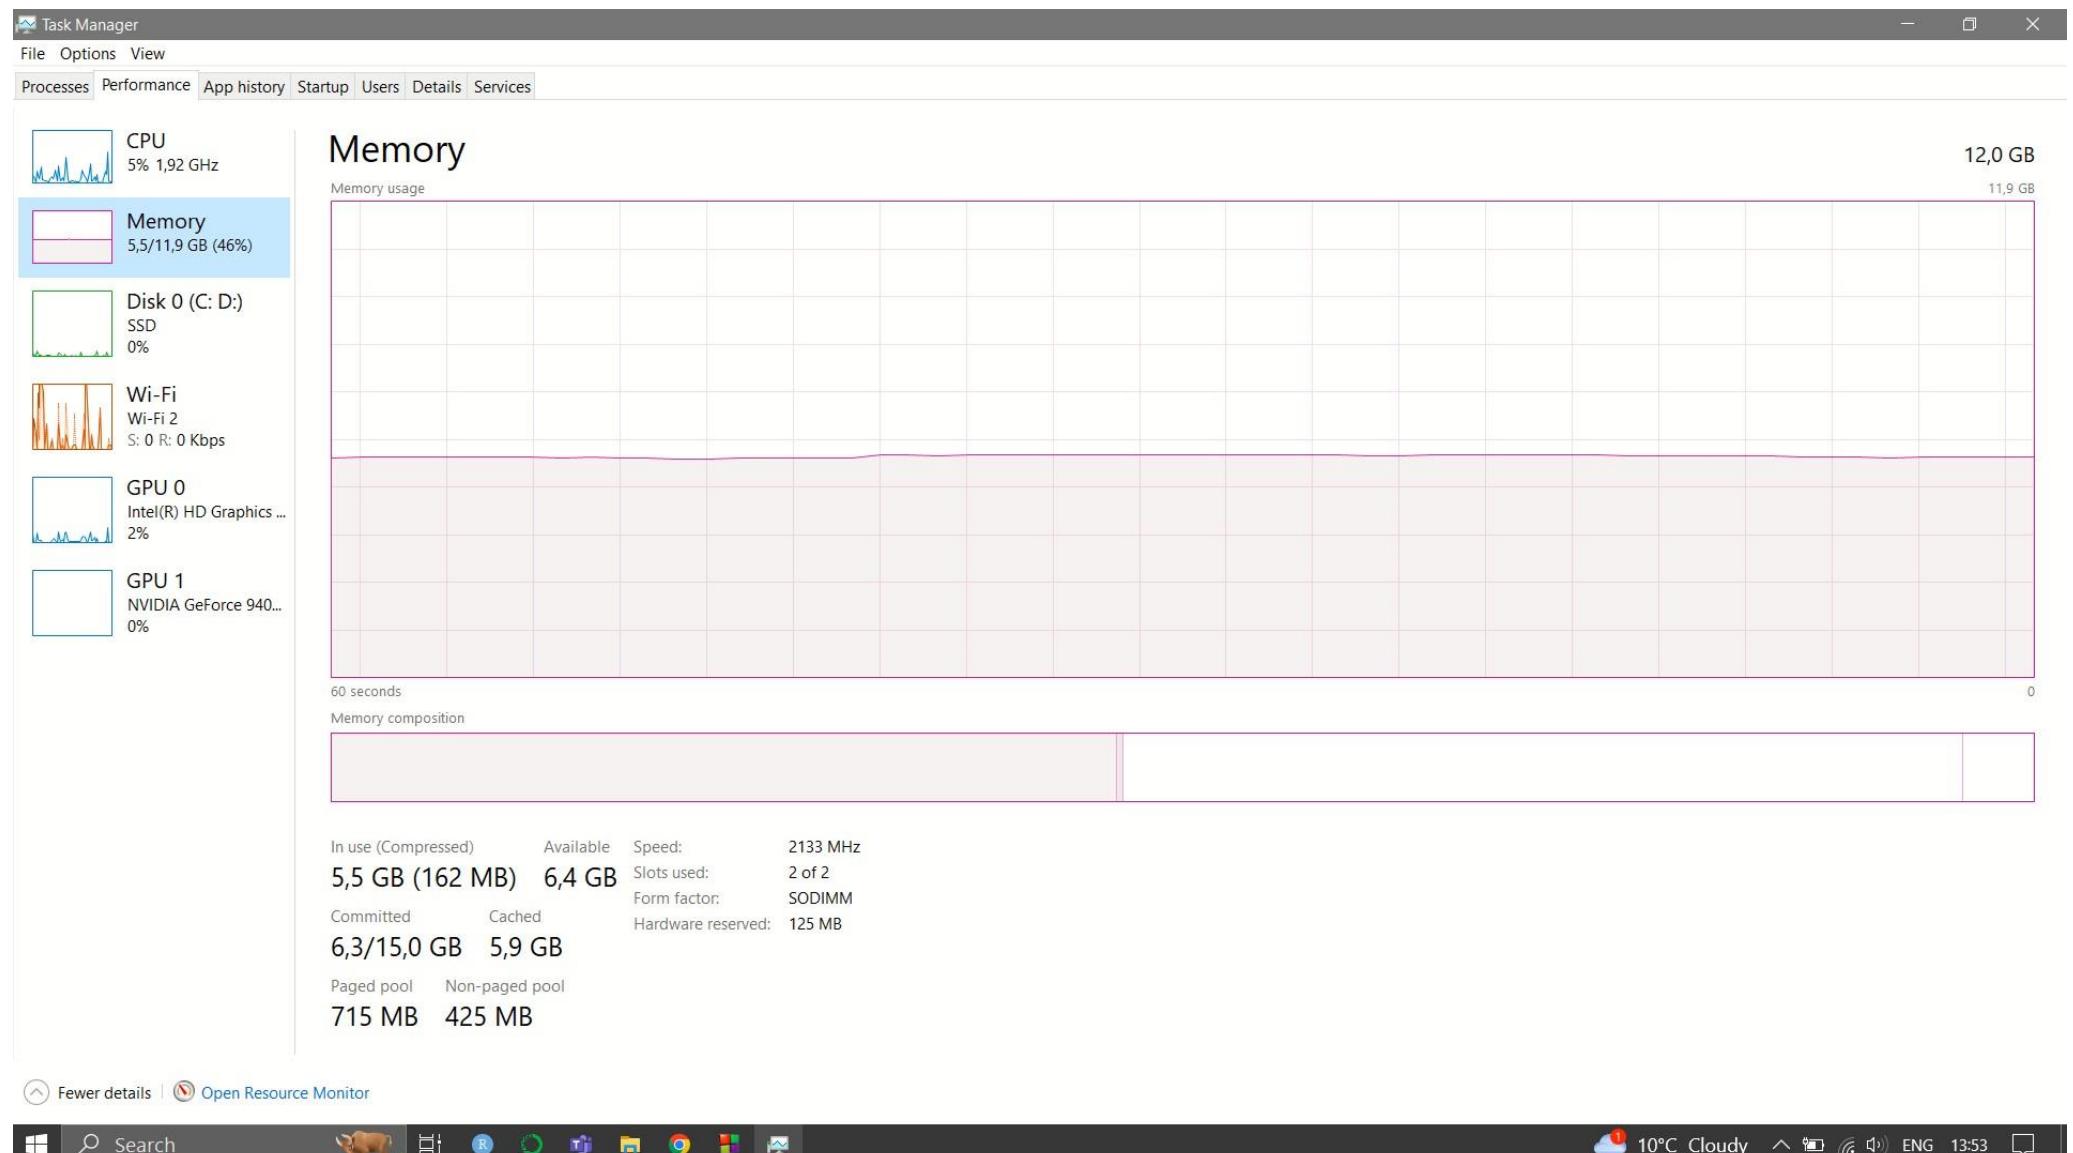

III startegija, failas su 10000 studentų naudojant std::vector

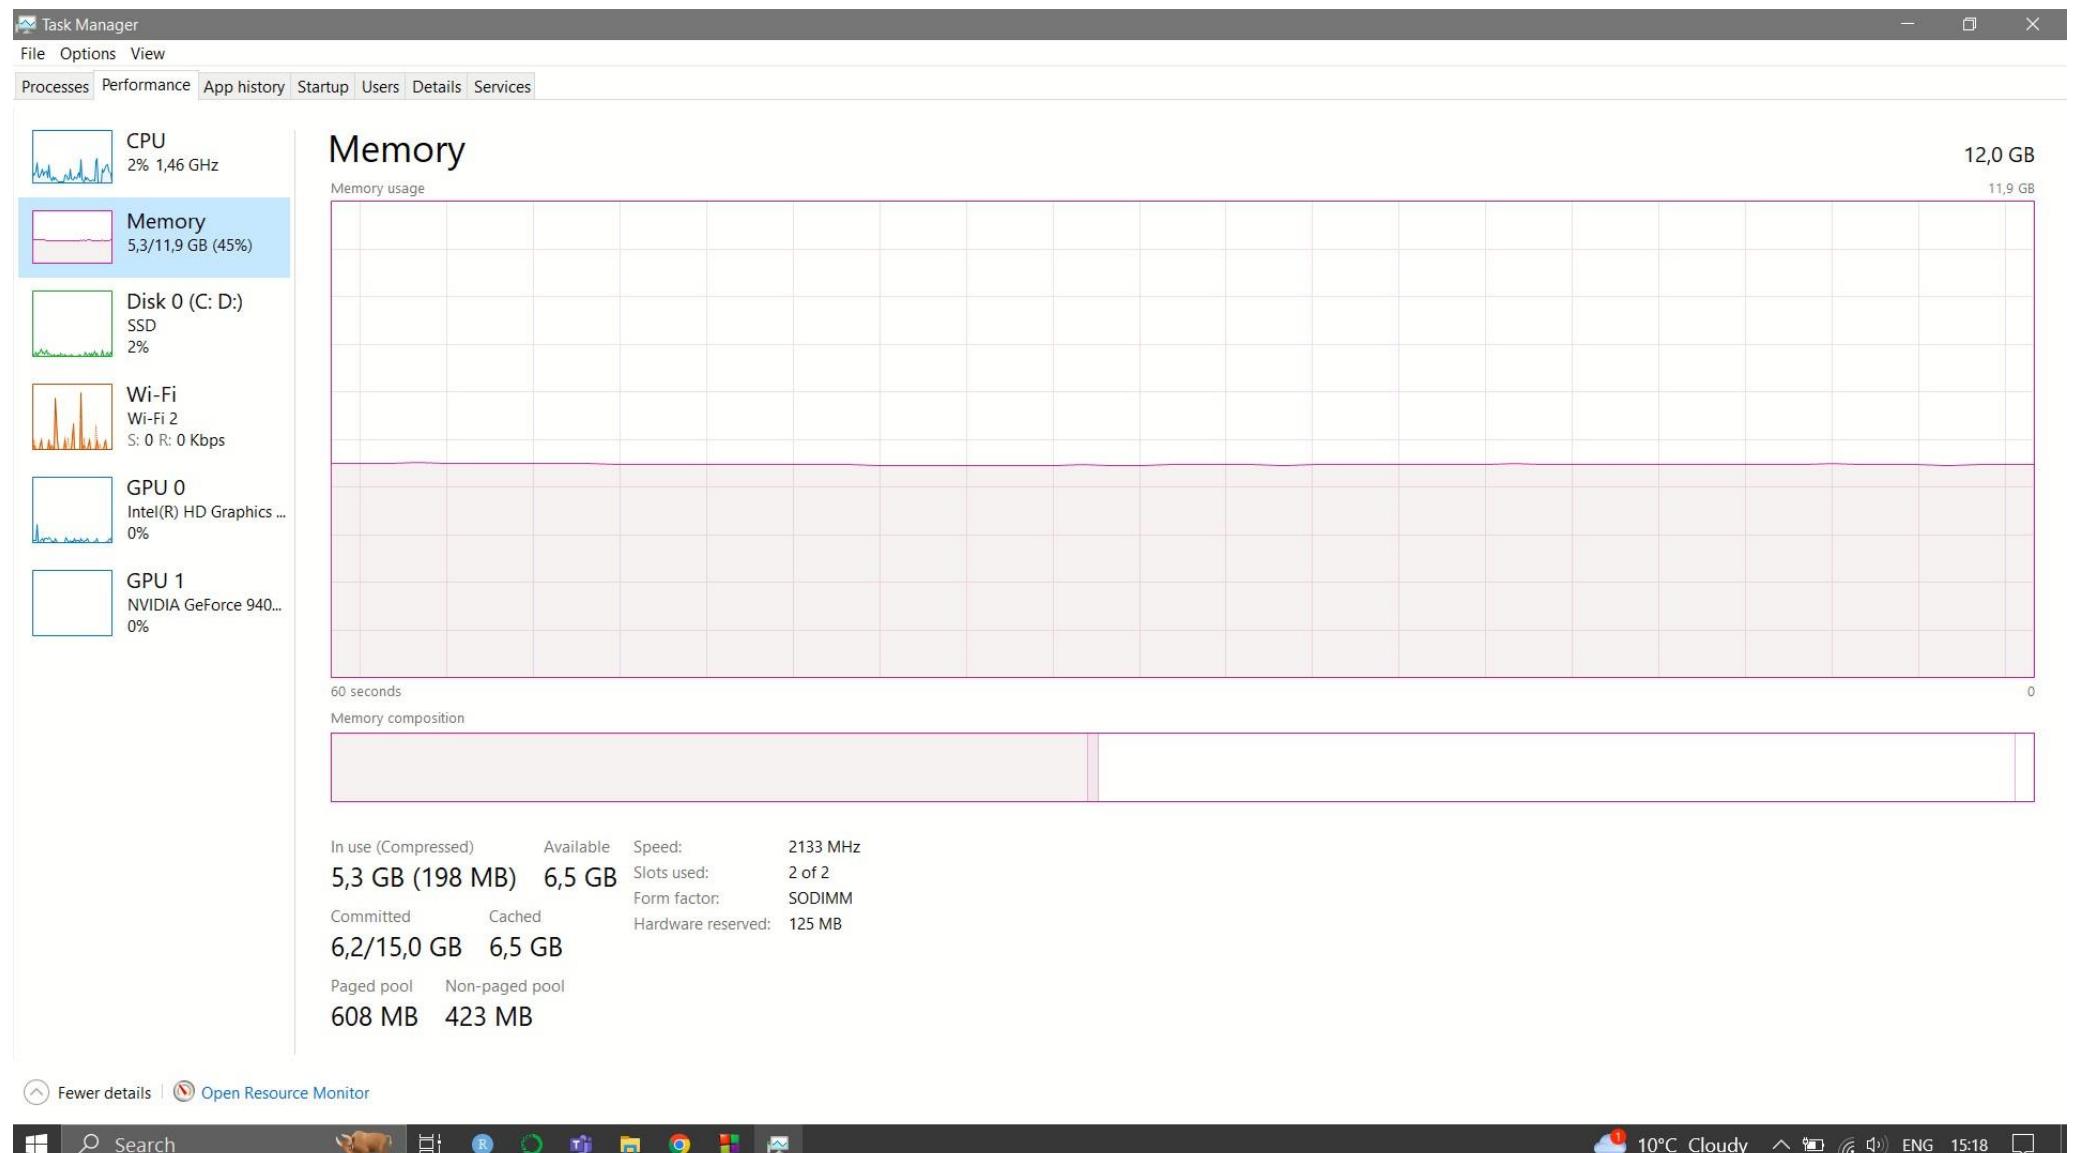

I startegija, failas su 10000 studentų naudojant std::list

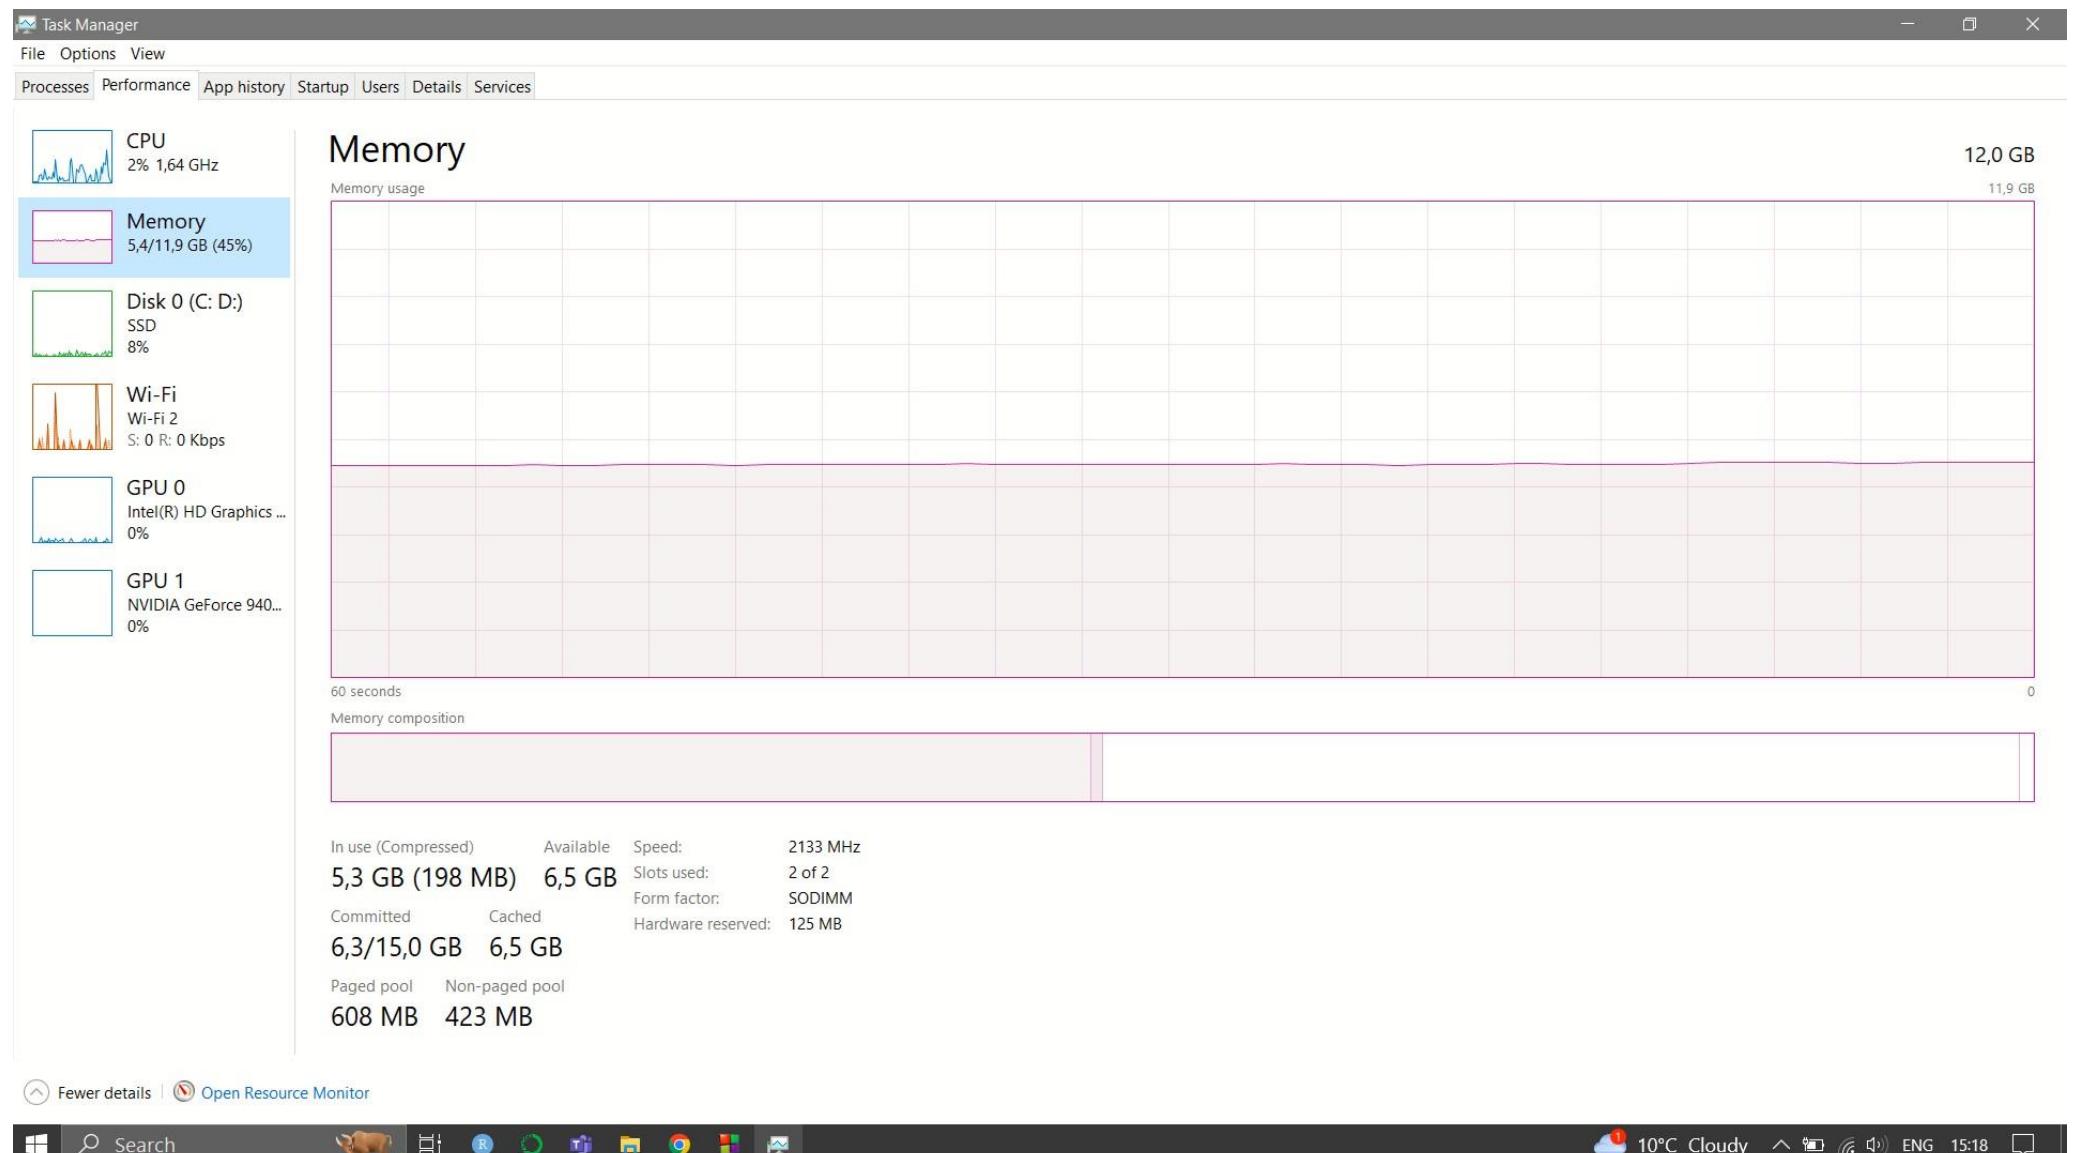

II startegija, failas su 10000 studentų naudojant std::list

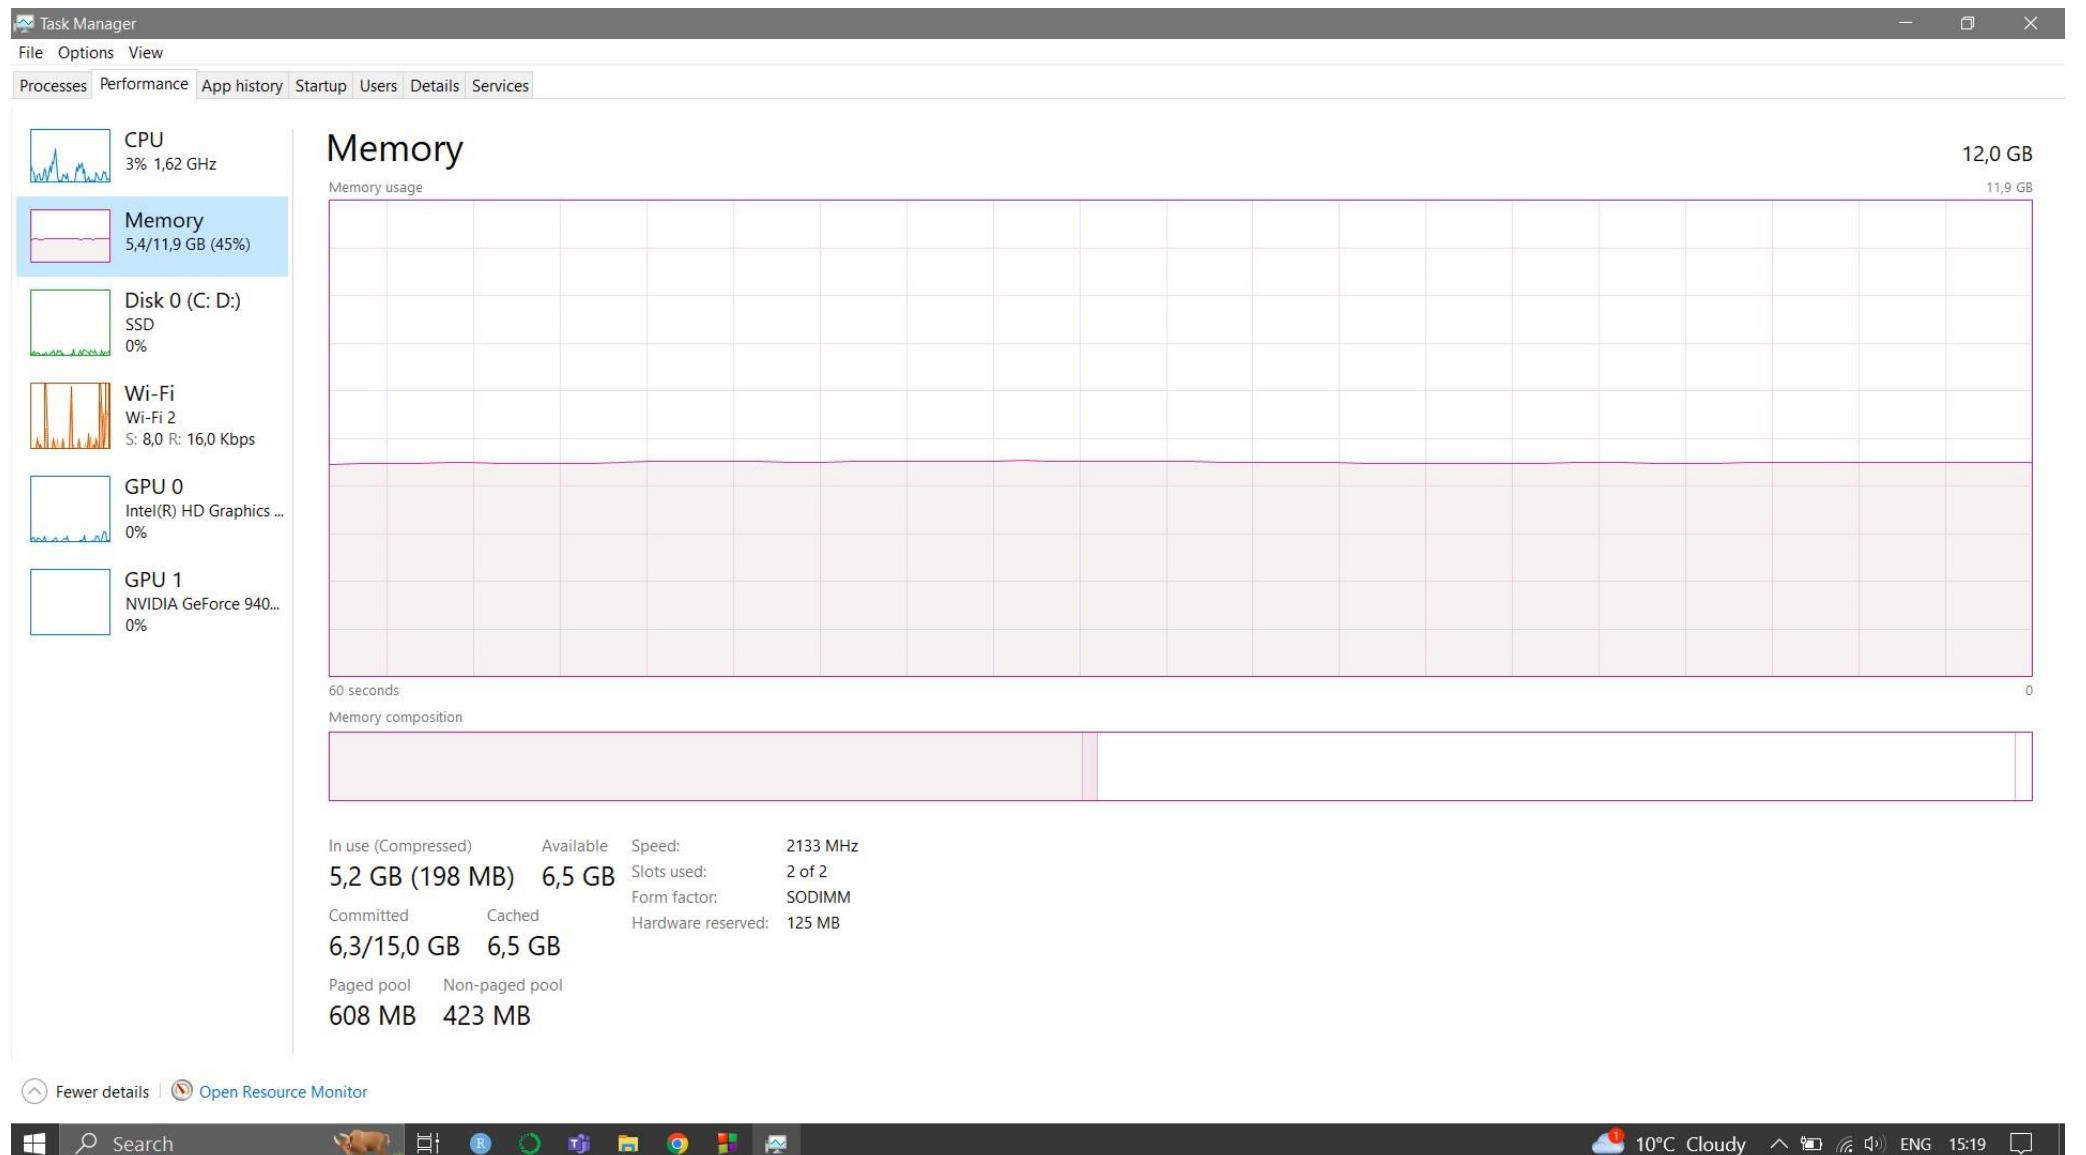

III startegija, failas su 10000 studentų naudojant std::list

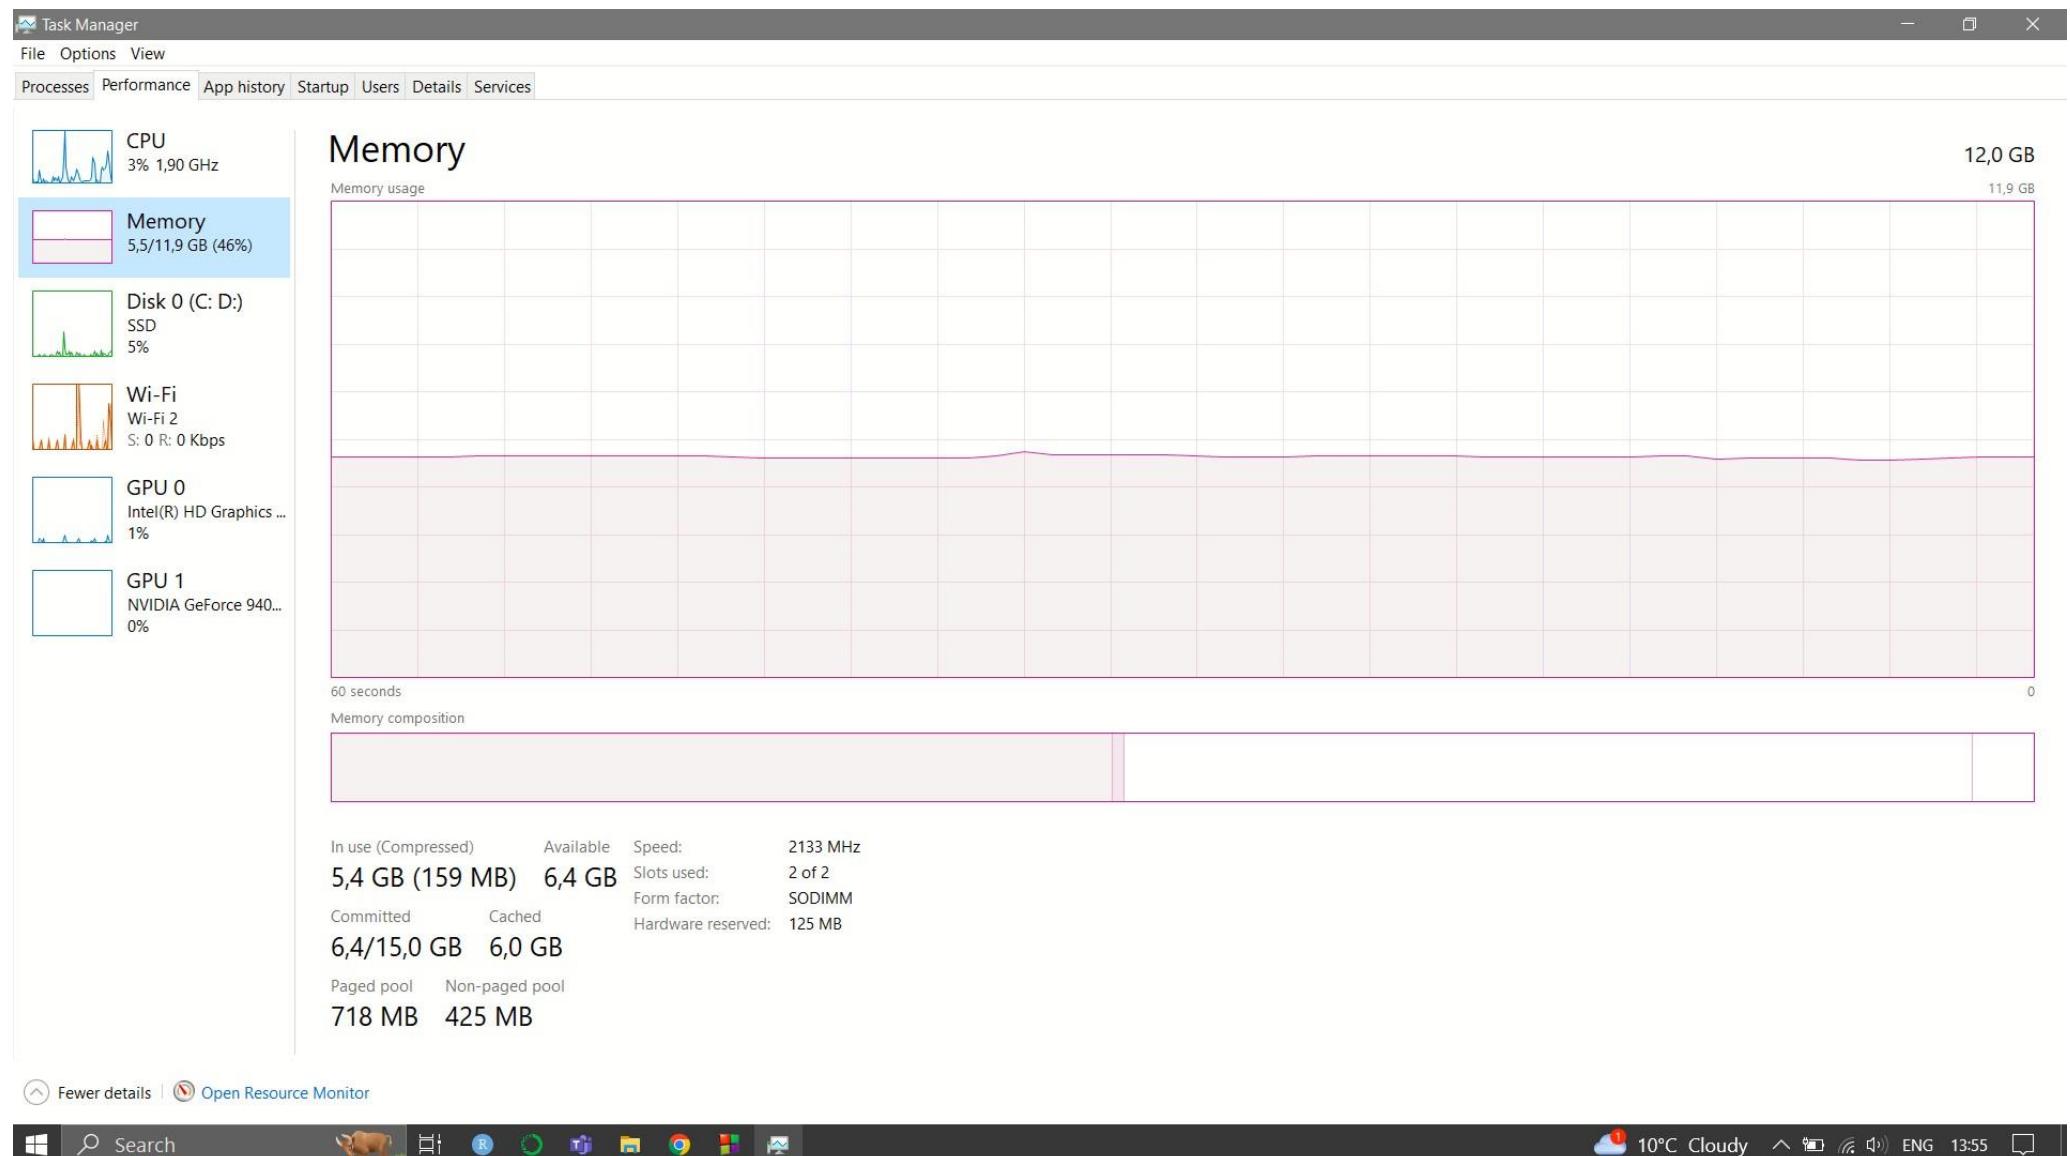

I startegija, failas su 100000 studentų naudojant std::vector

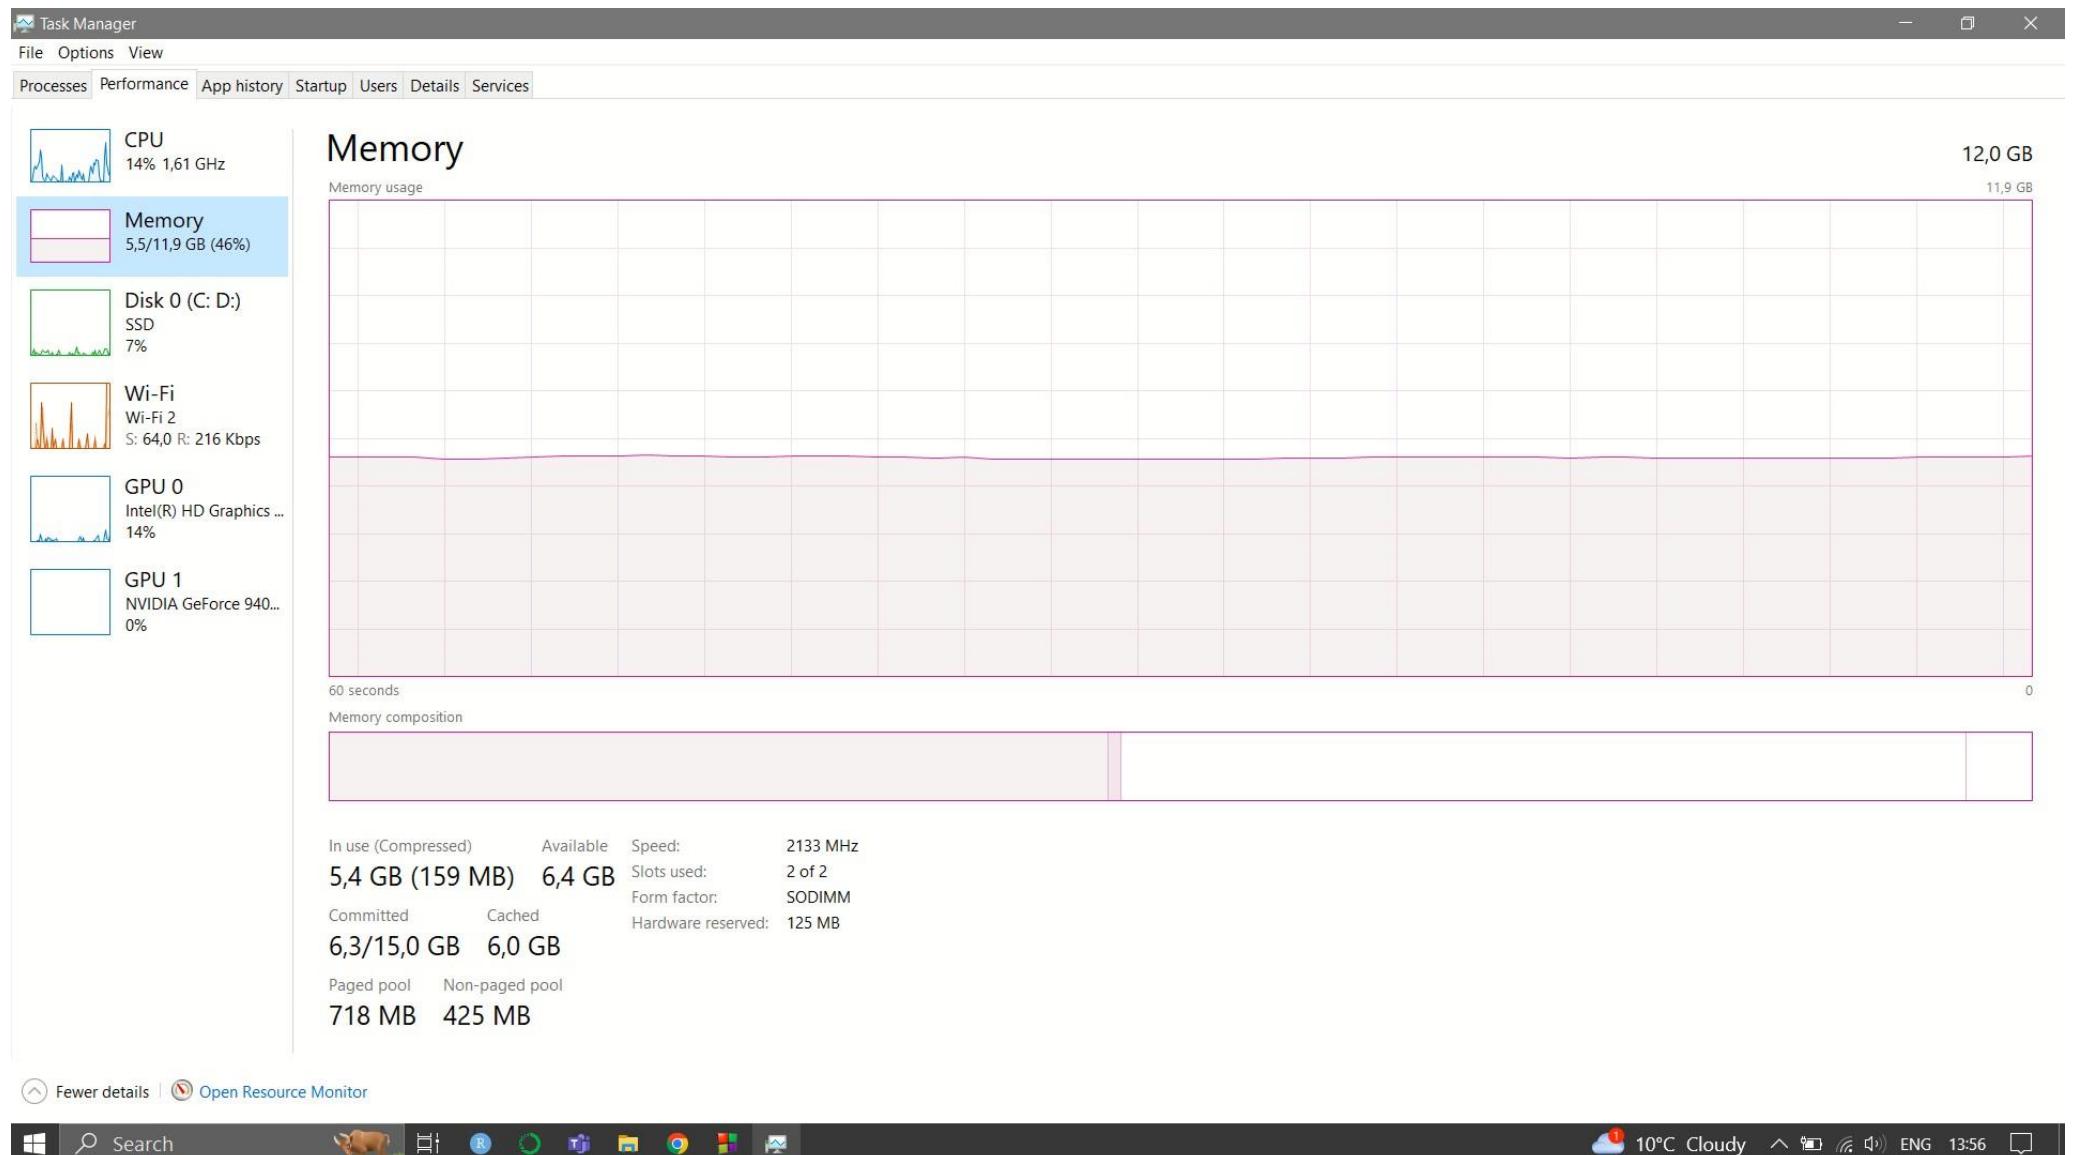

II startegija, failas su 100000 studentų naudojant std::vector

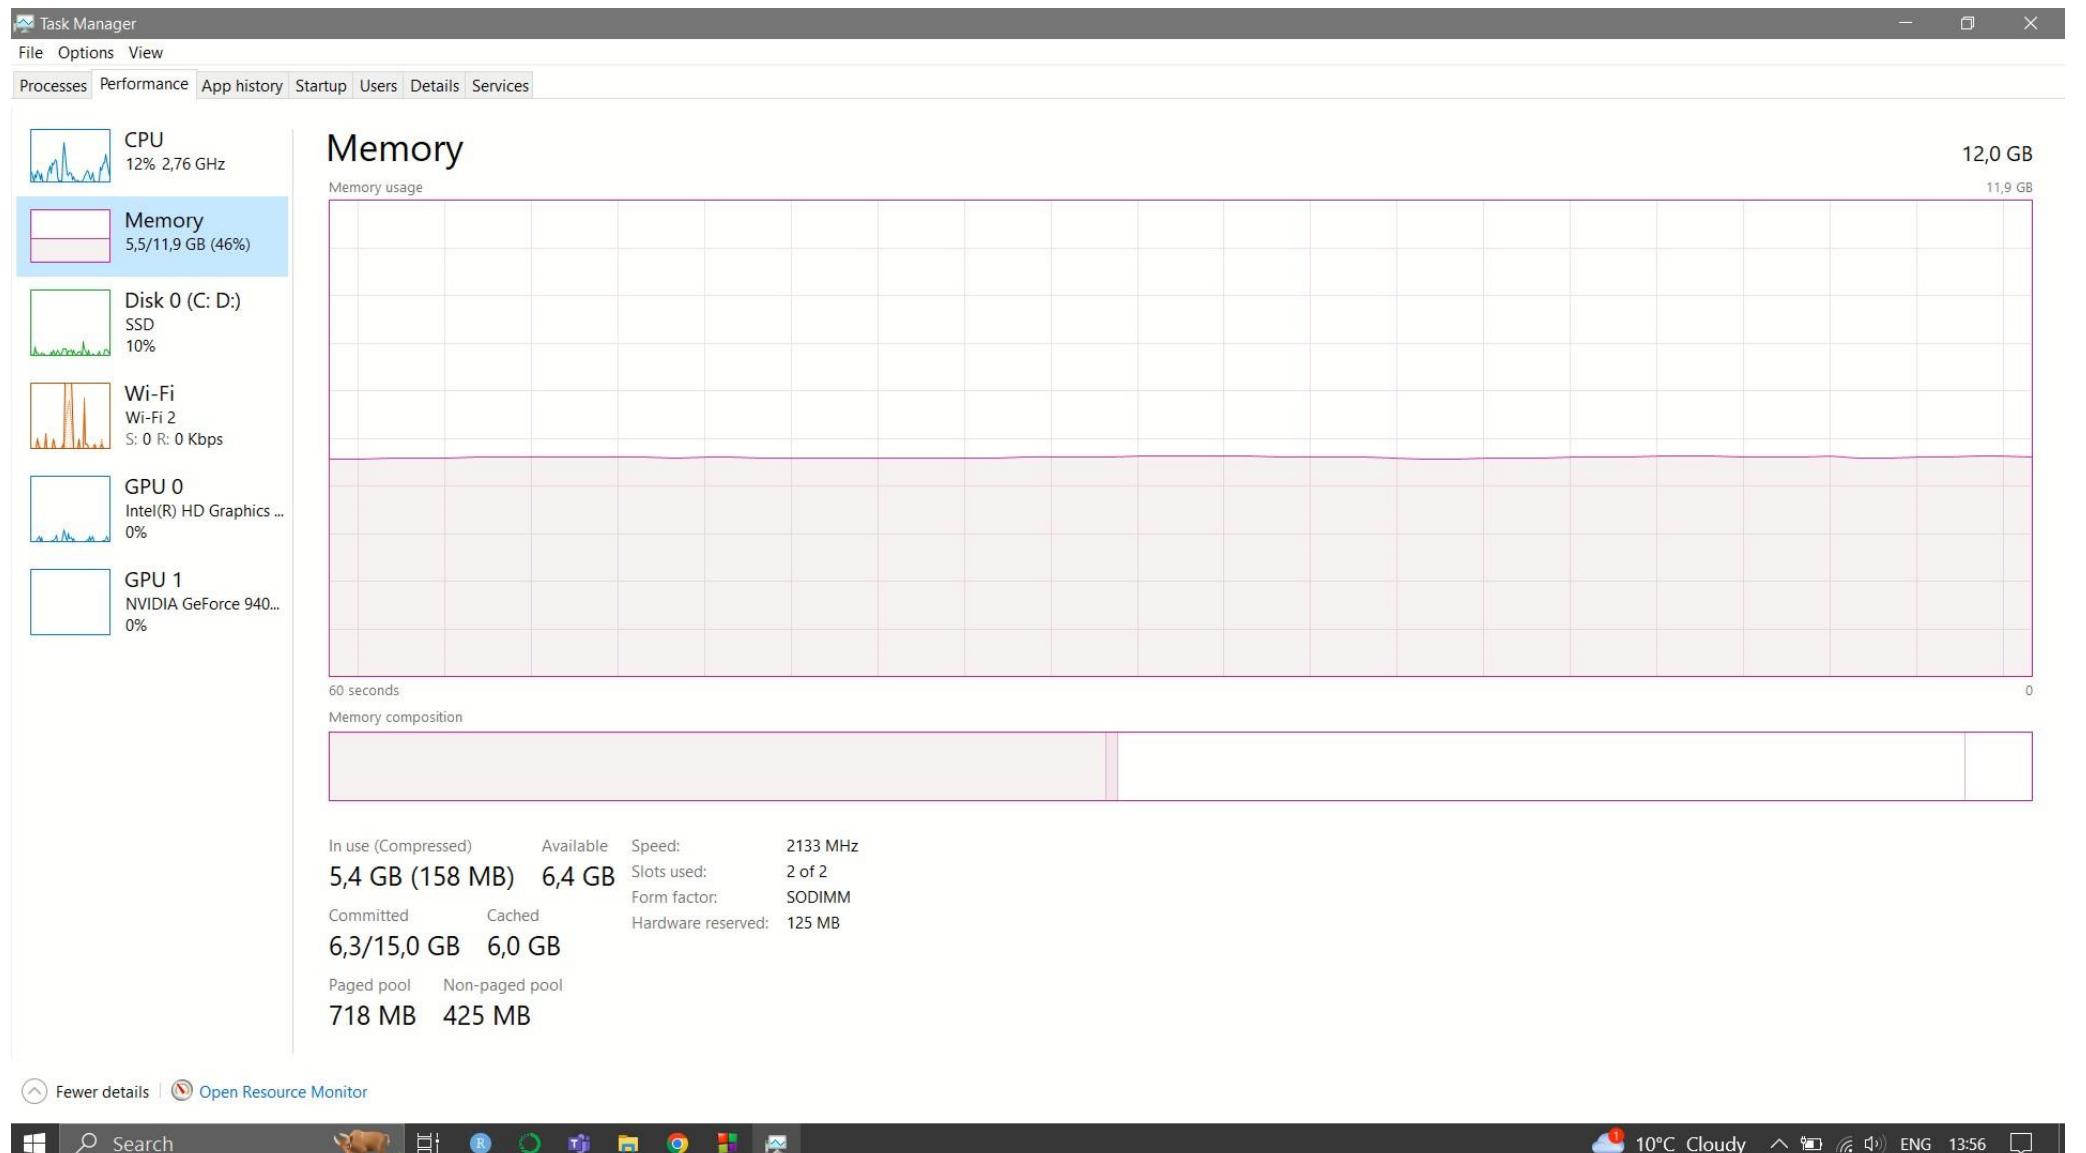

III startegija, failas su 100000 studentų naudojant std::vector

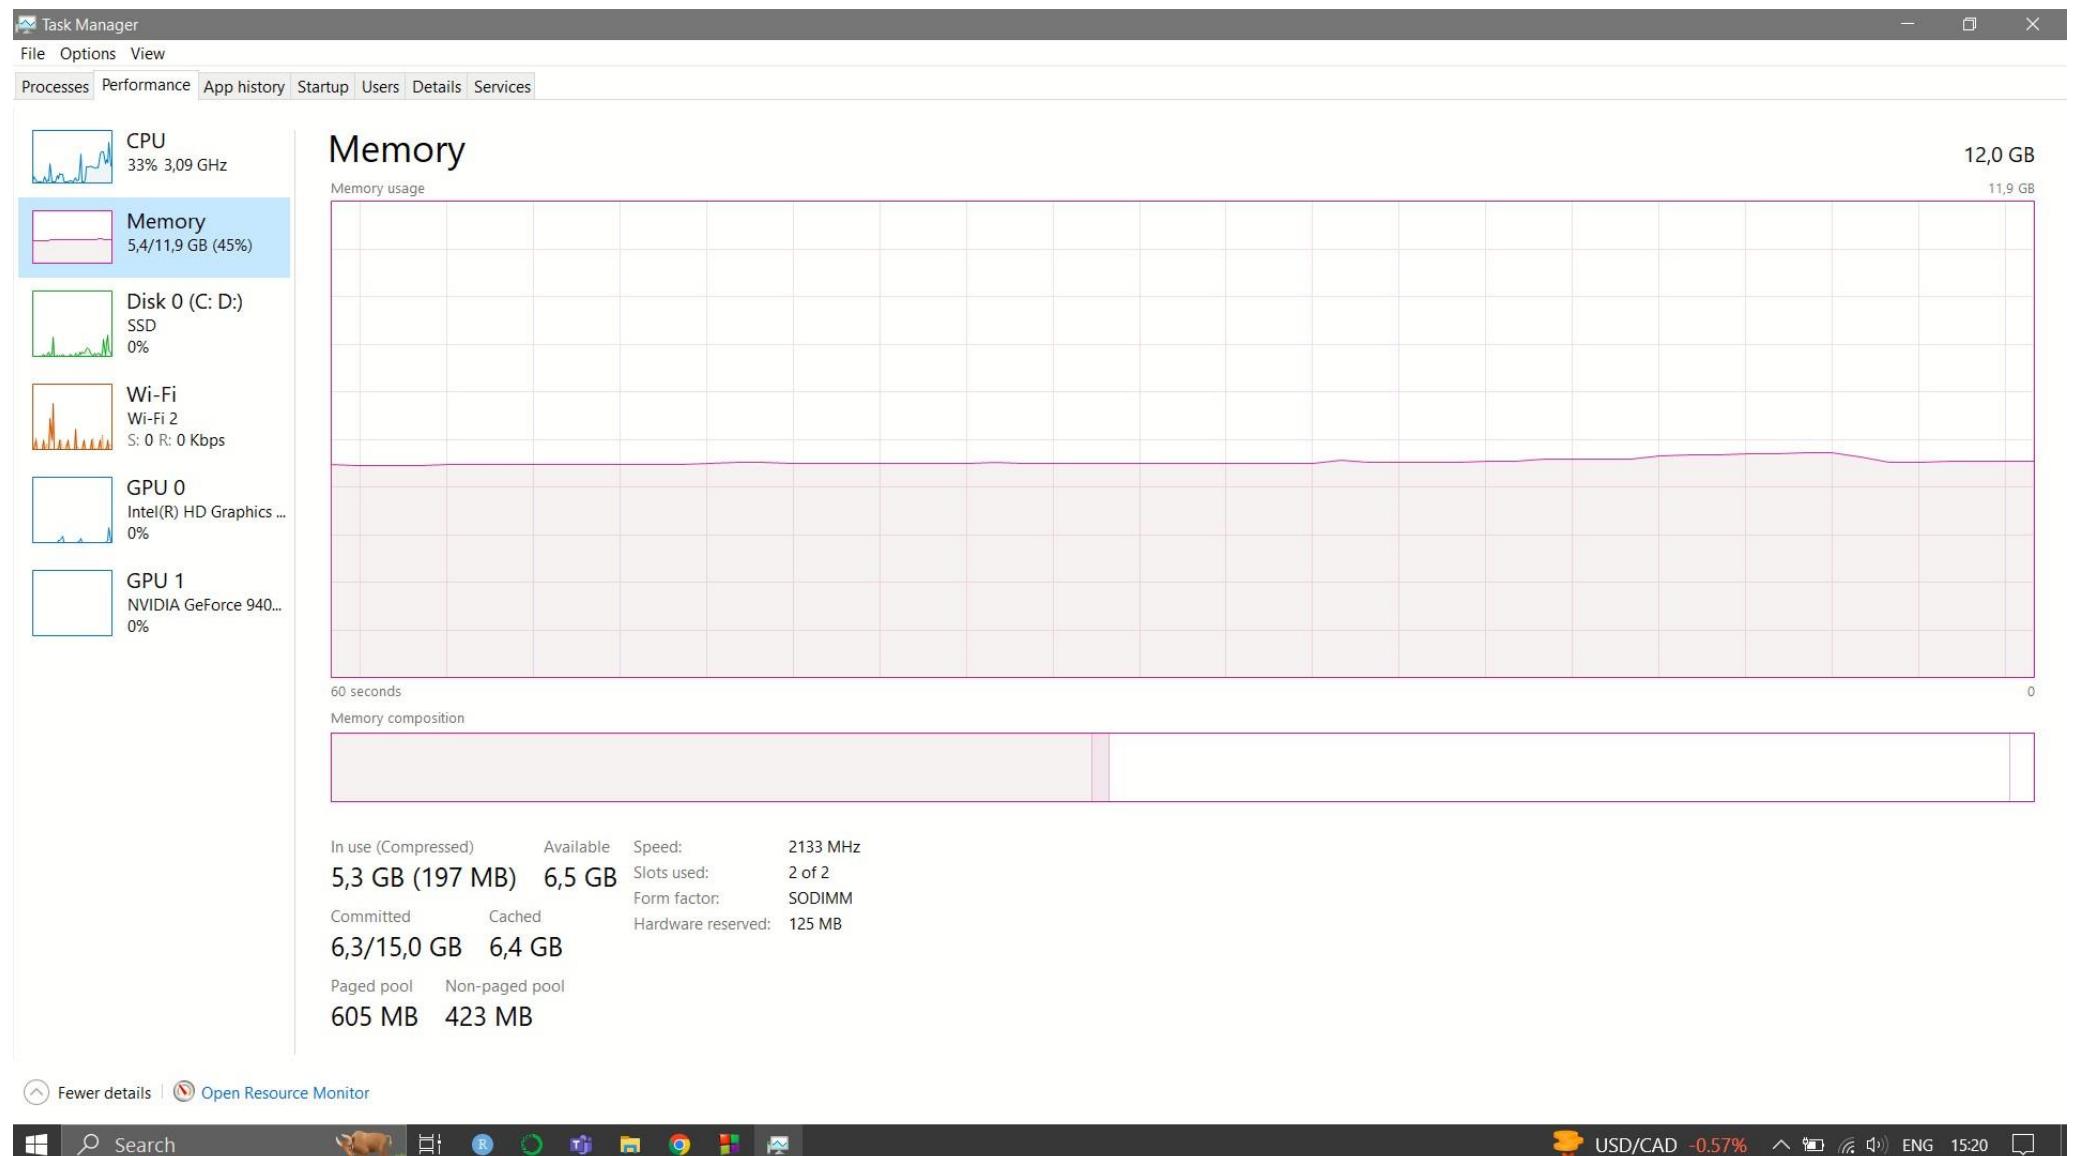

I startegija, failas su 100000 studenty naudojant std::list

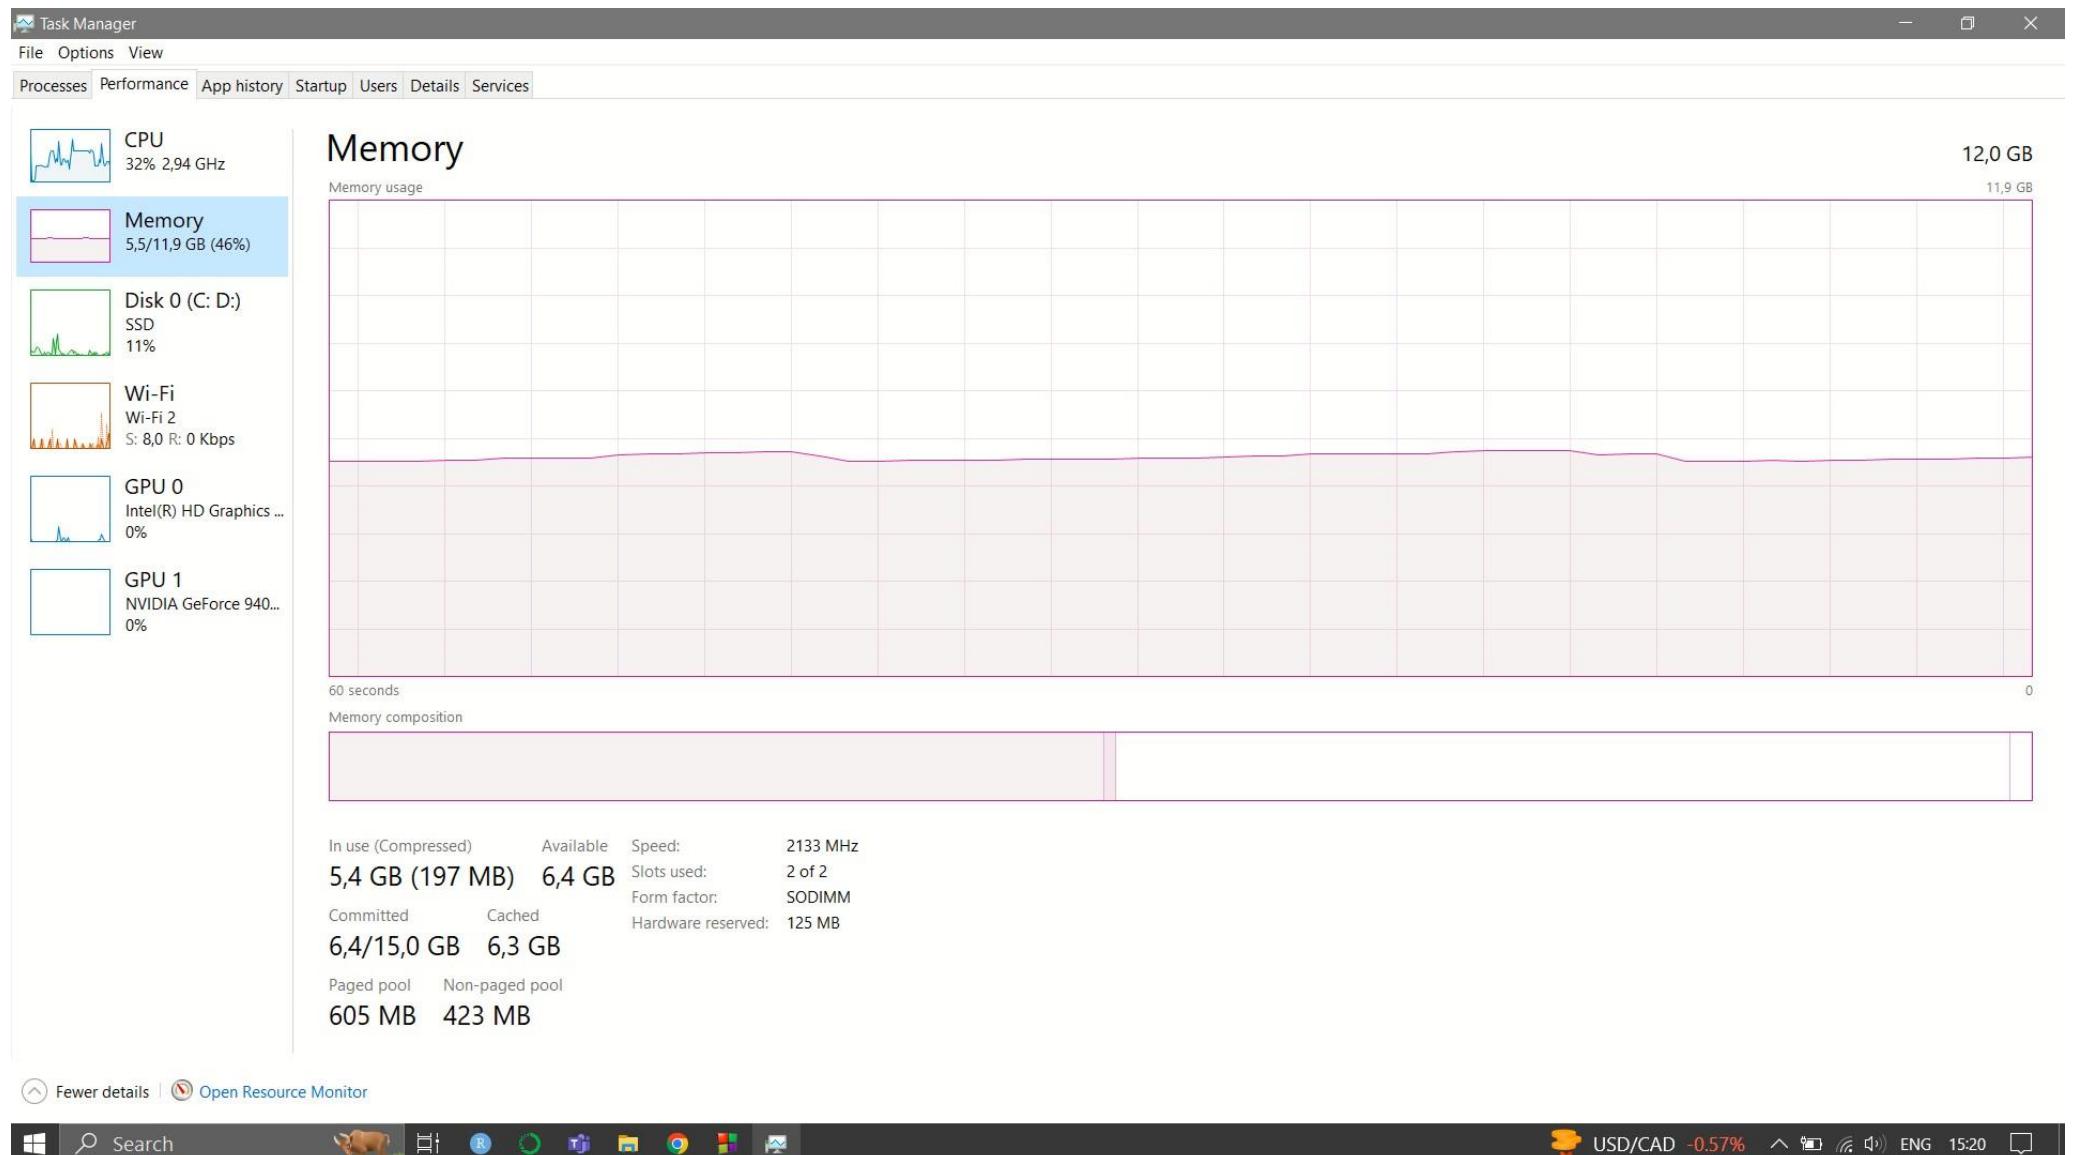

II startegija, failas su 100000 studentų naudojant std::list

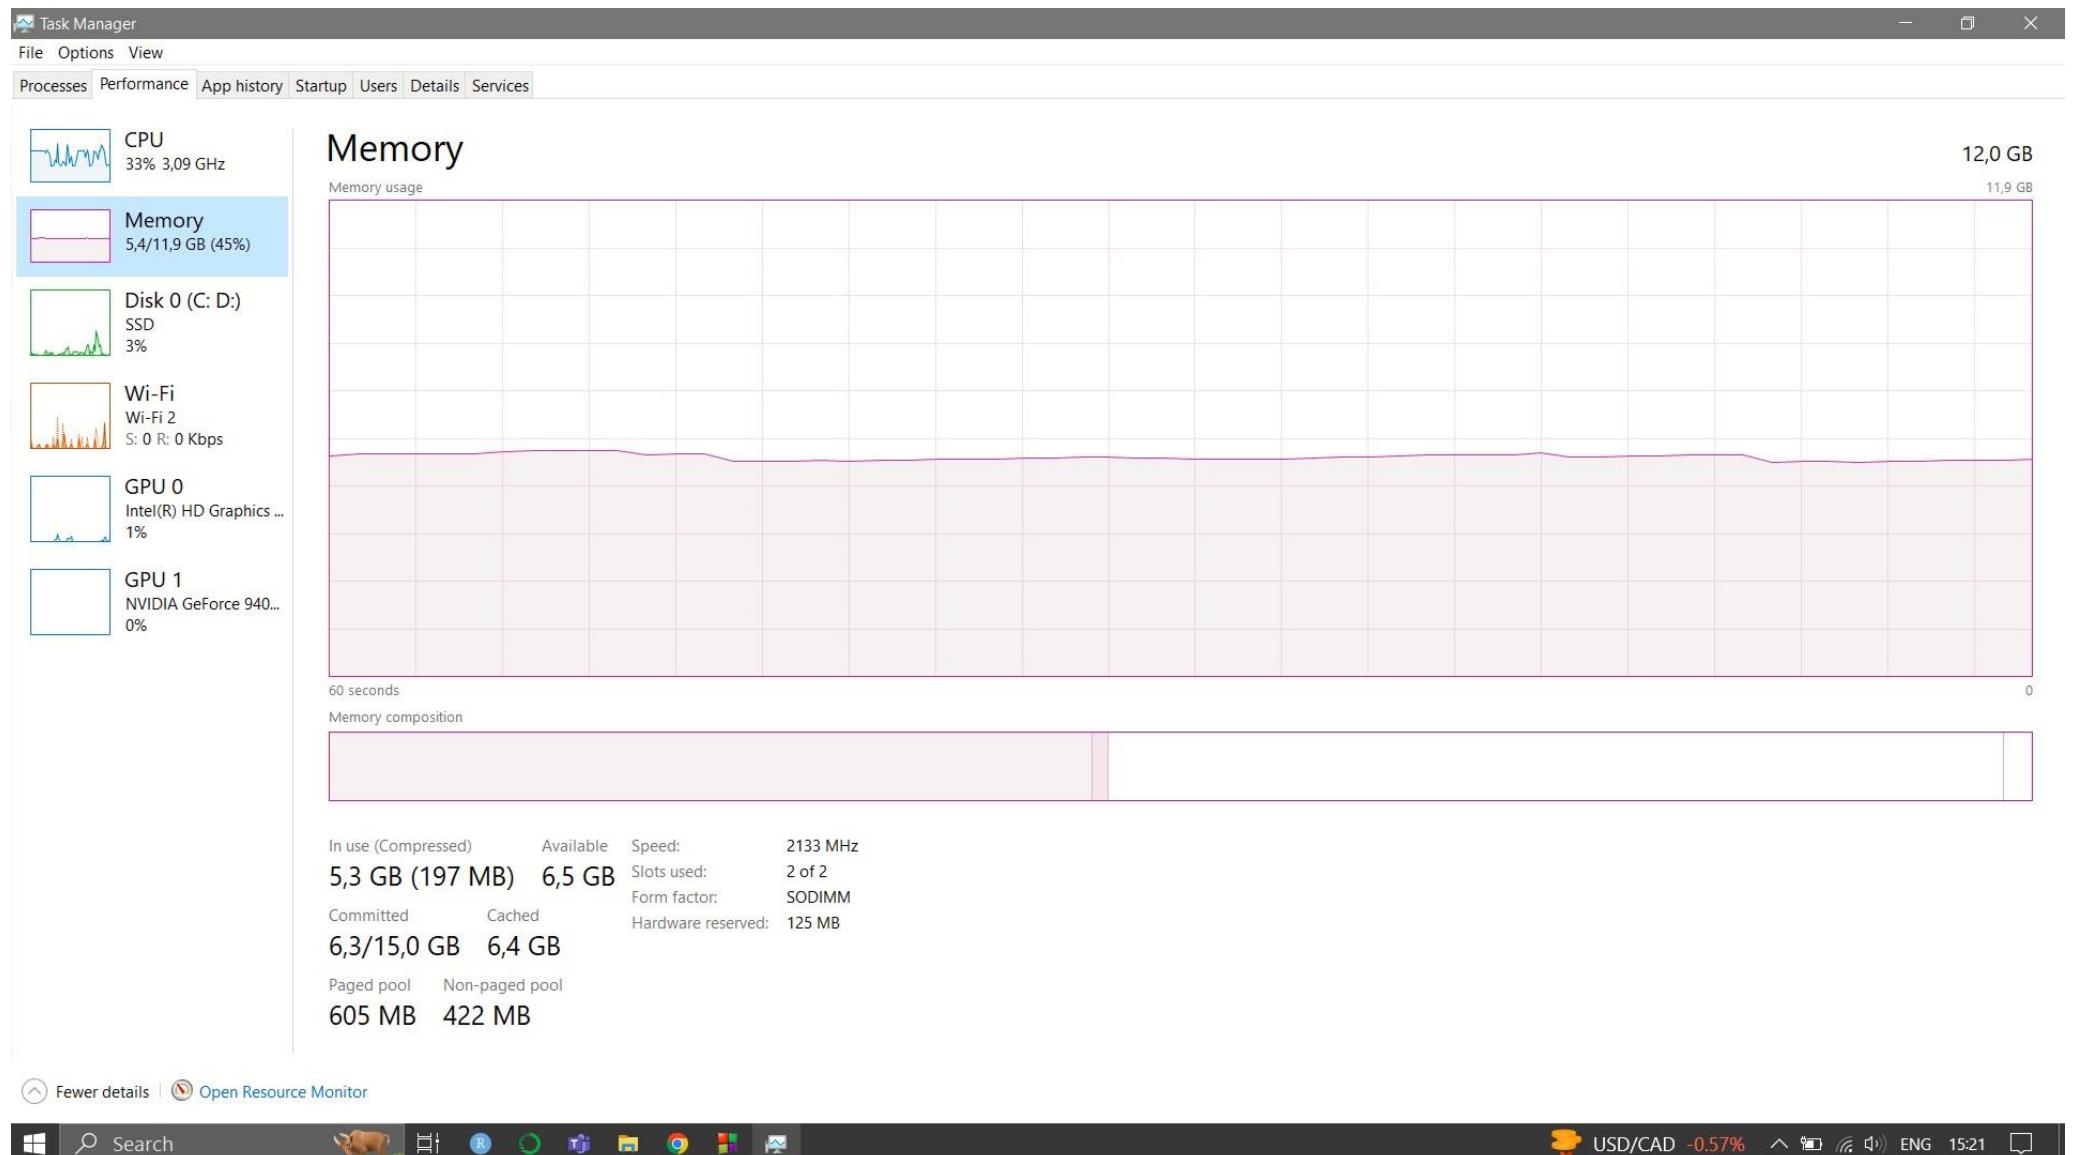

III startegija, failas su 100000 studentų naudojant std::list

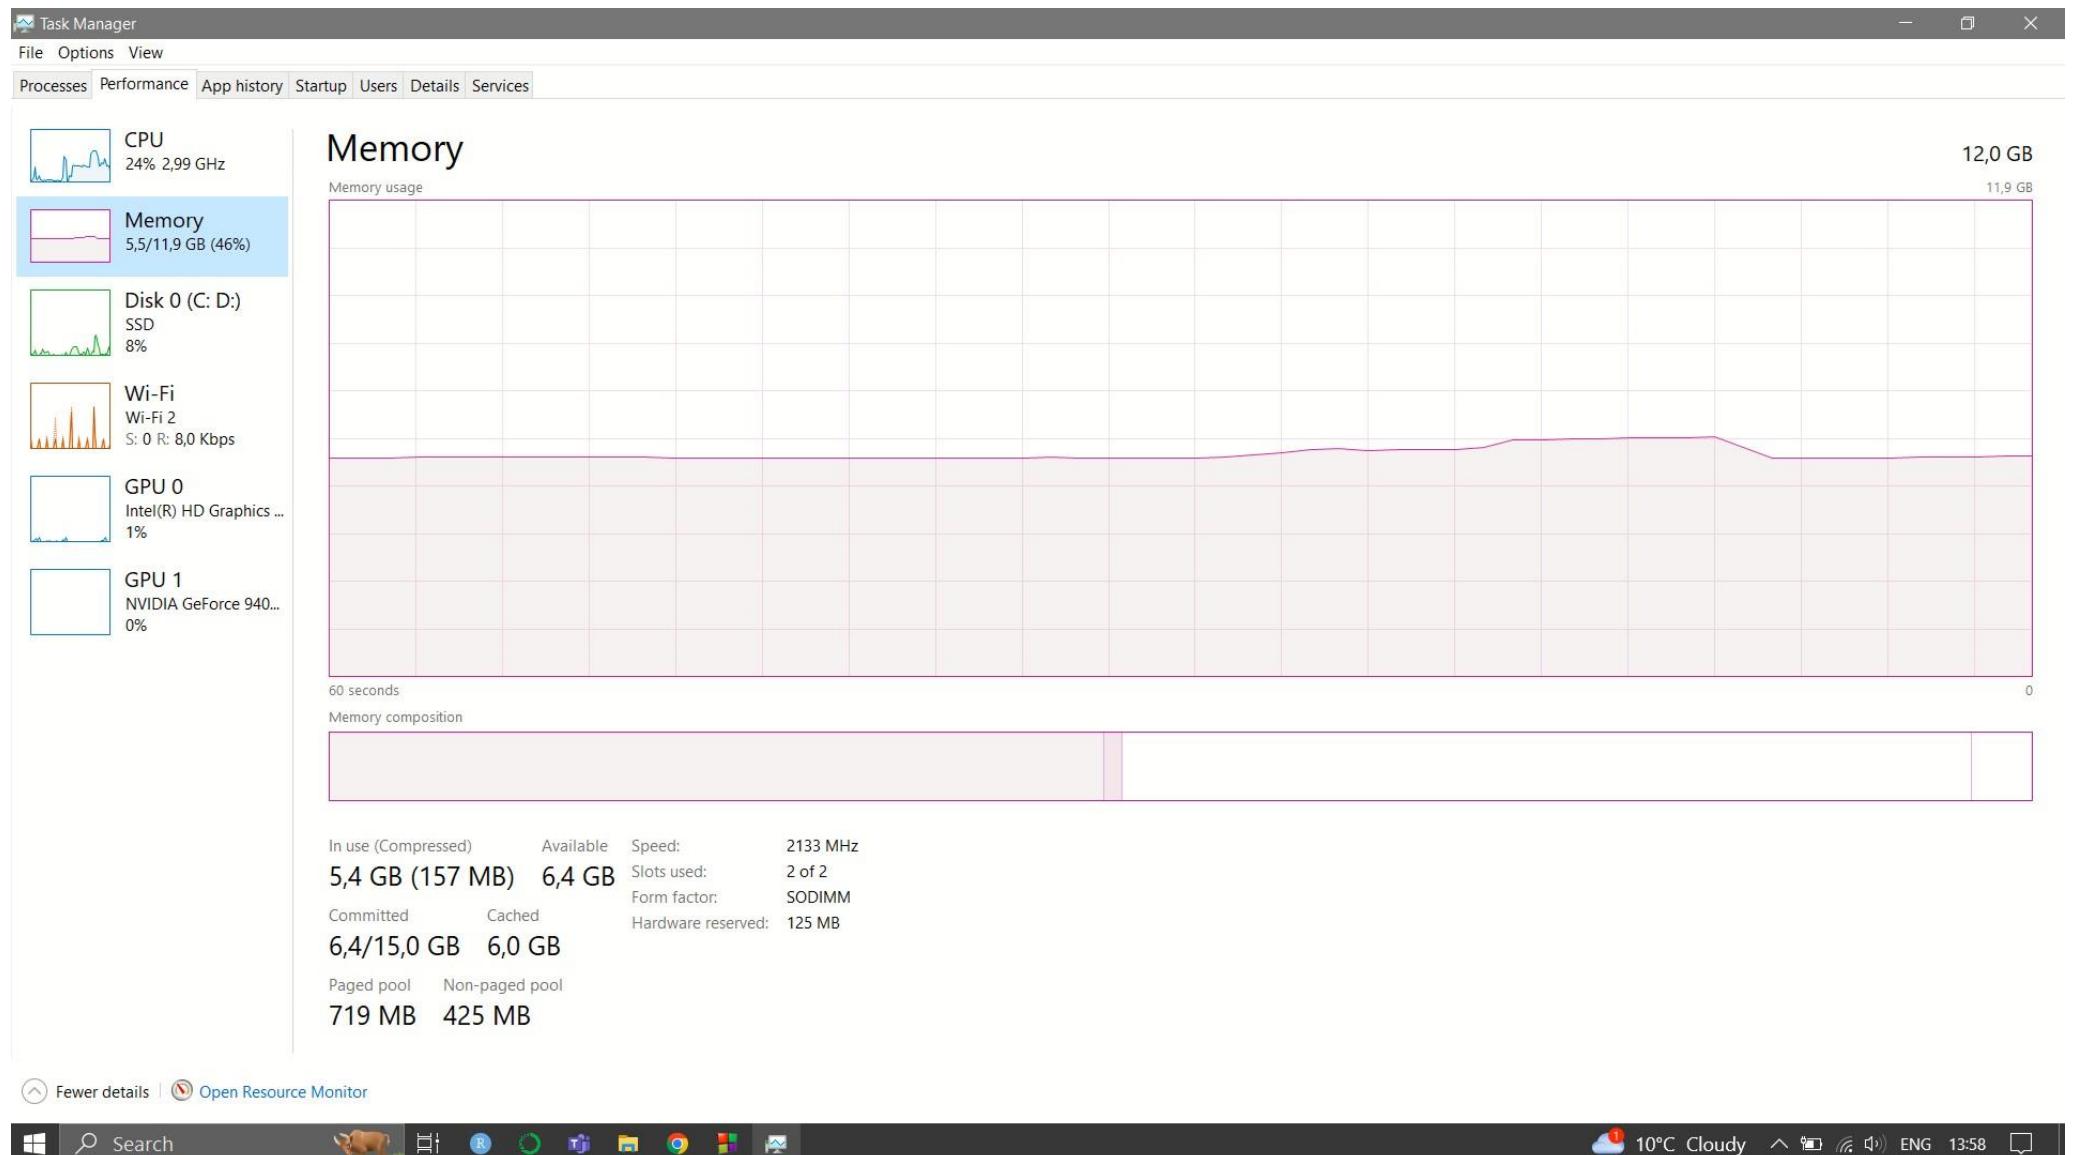

I startegija, failas su 1000000 studentų naudojant std::vector

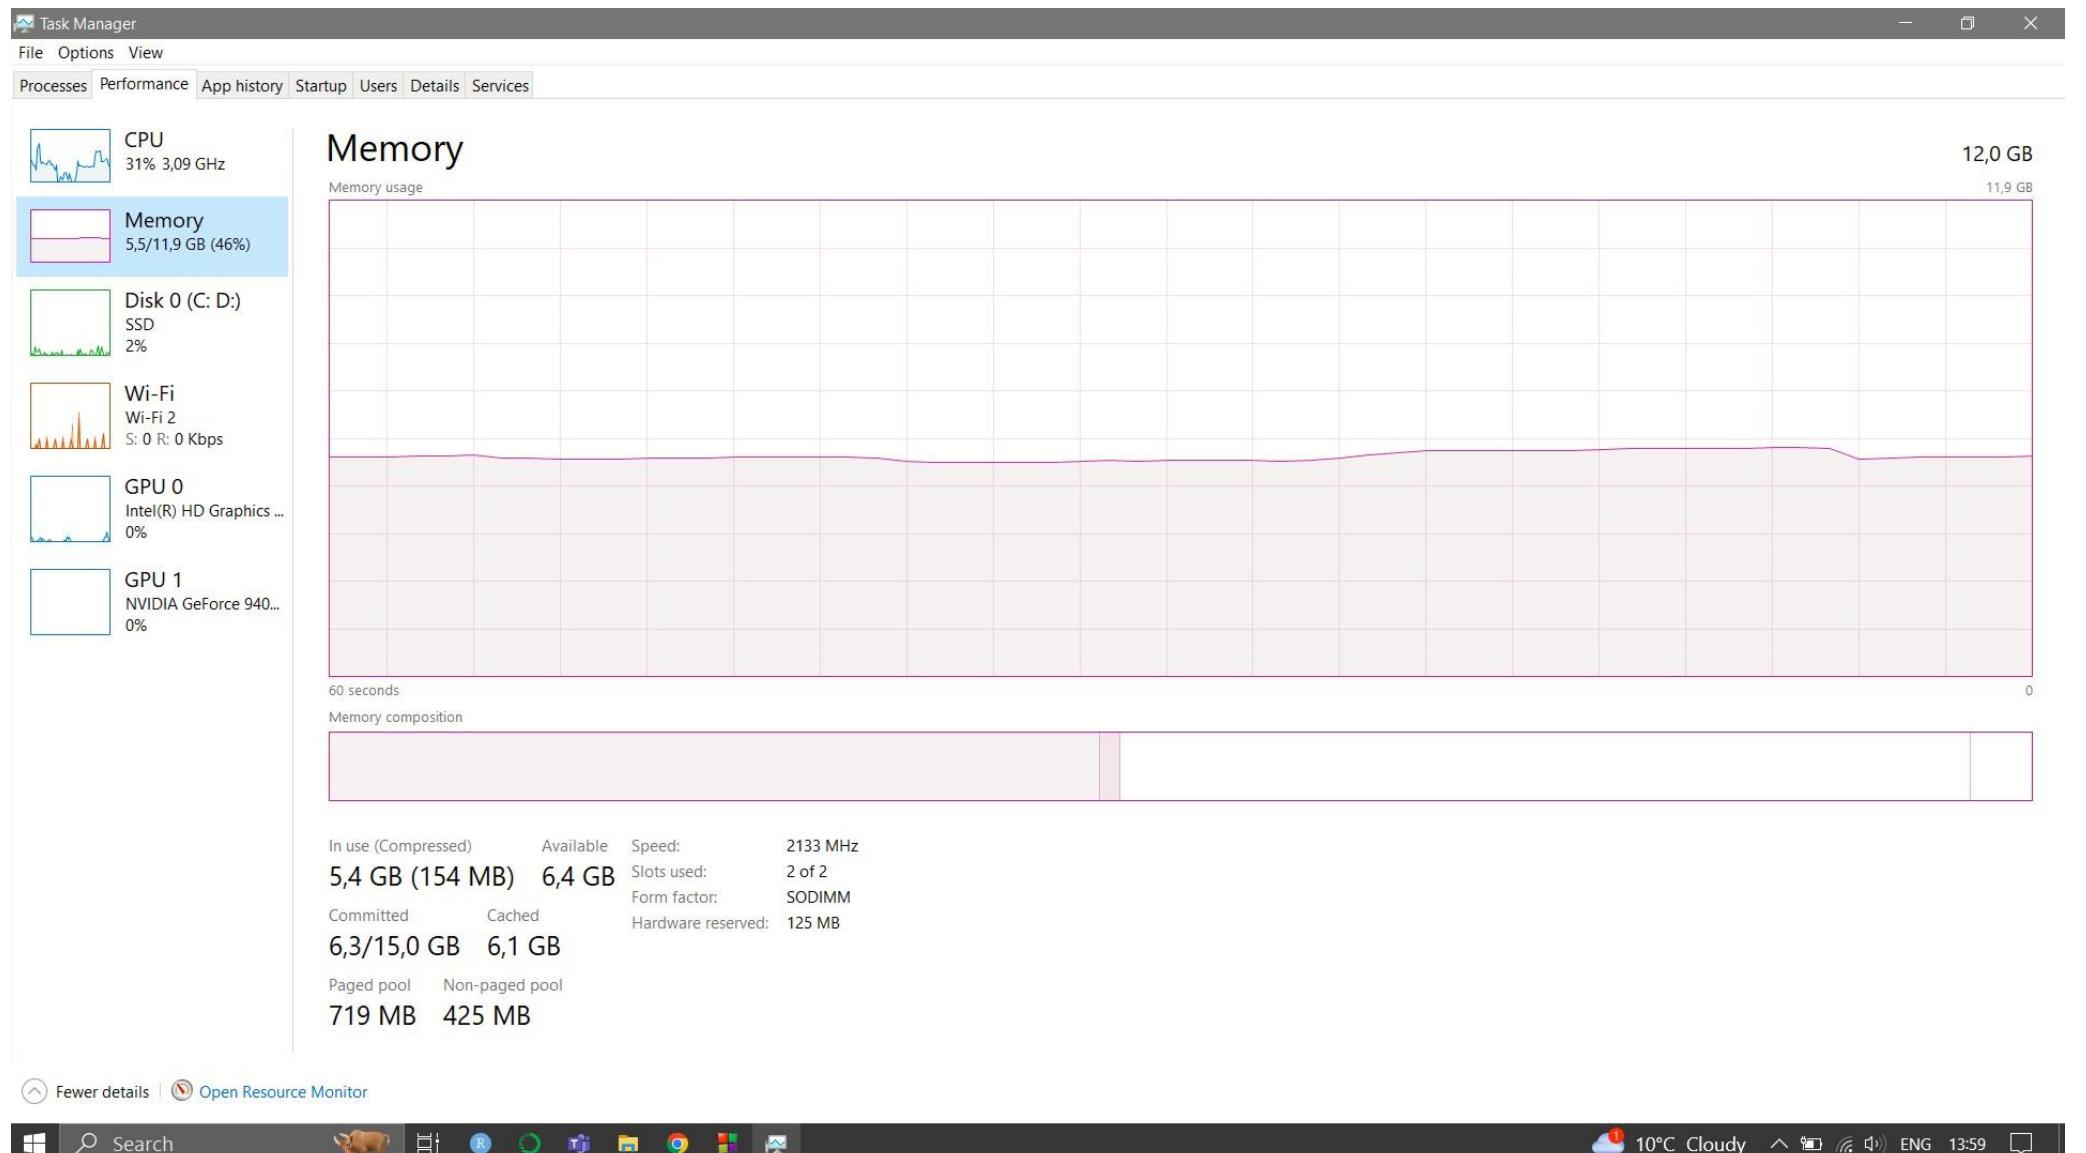

II startegija, failas su 1000000 studentų naudojant std::vector

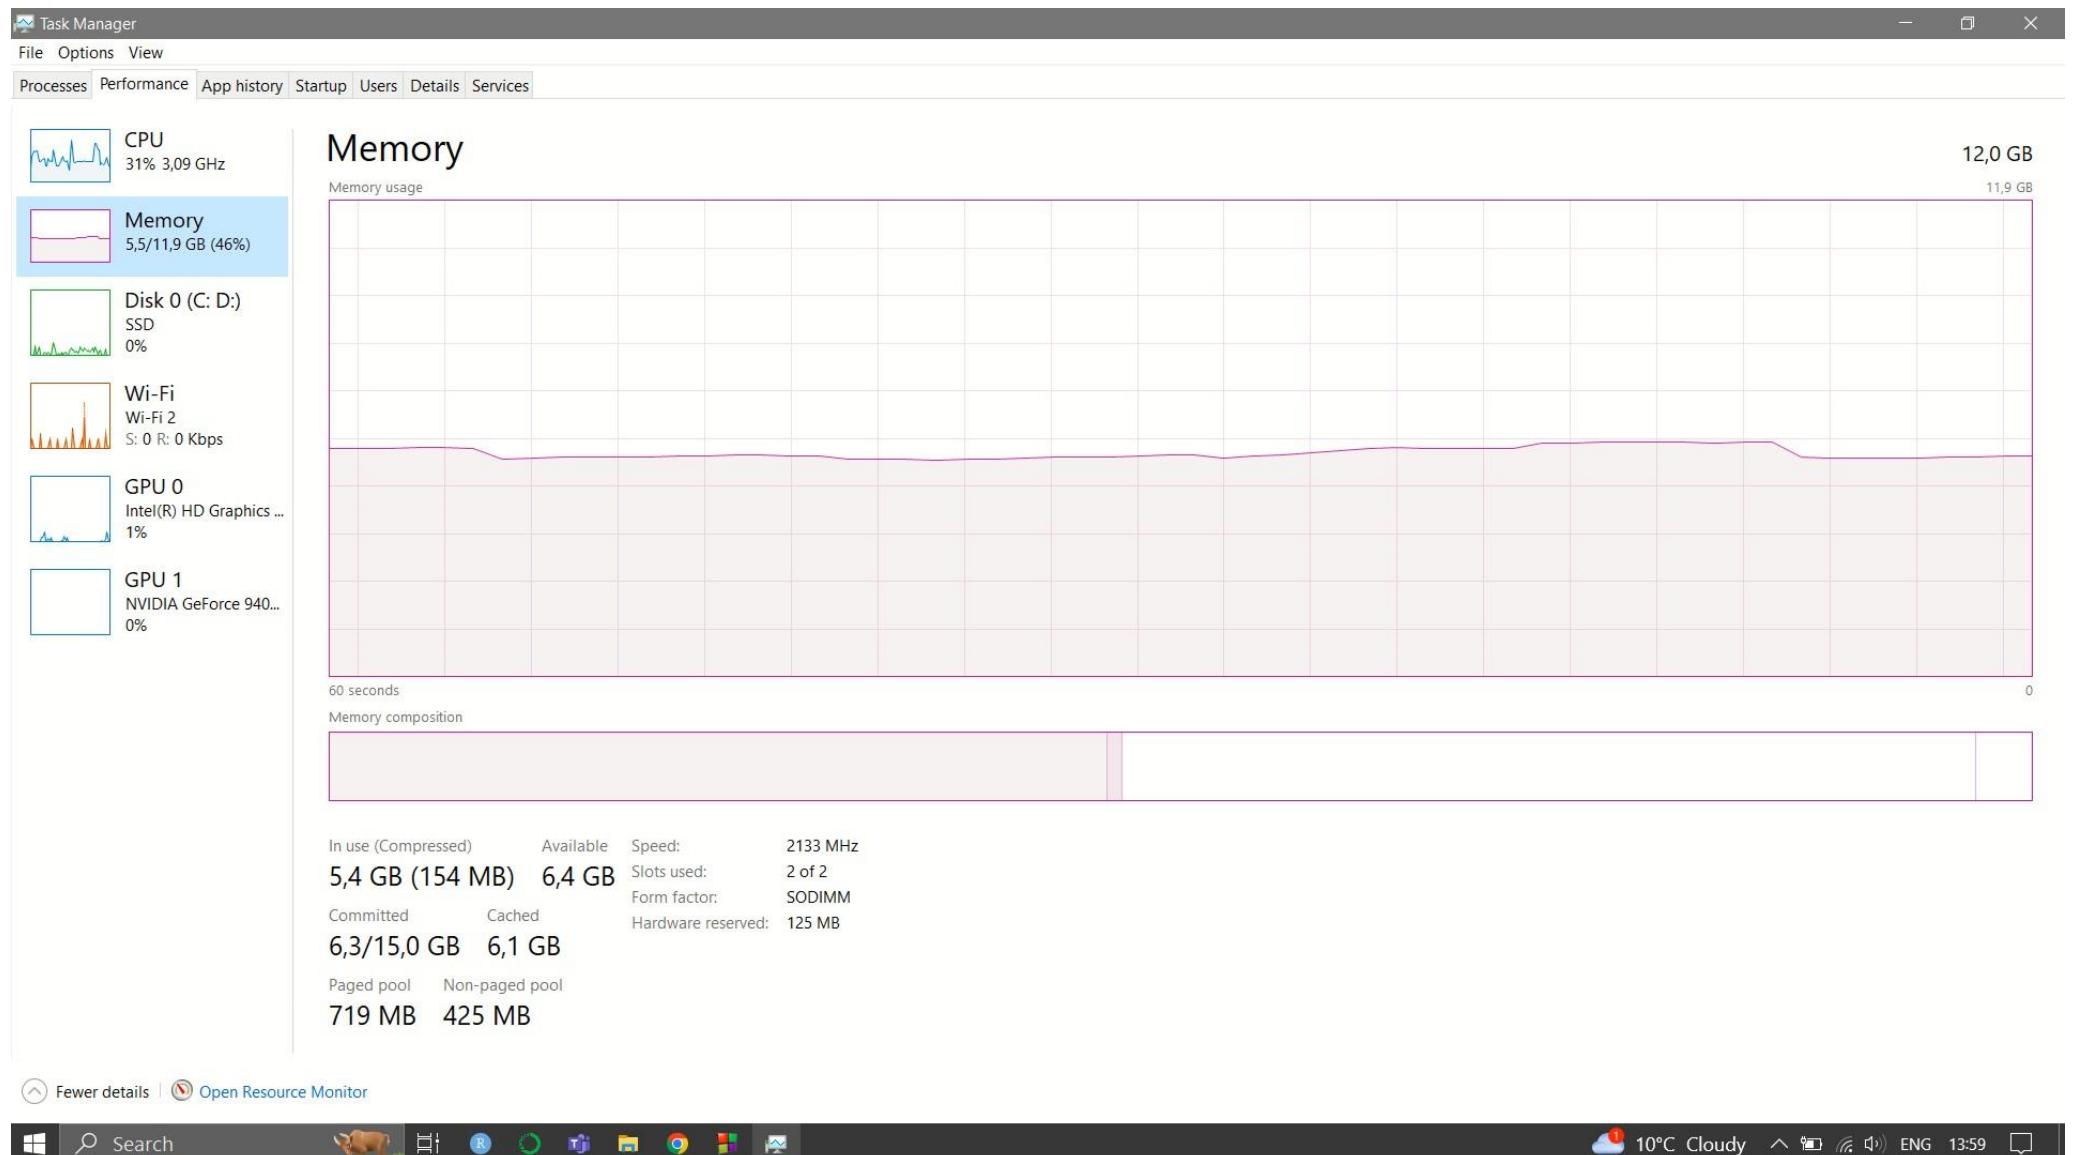

III startegija, failas su 1000000 studentų naudojant std::vector

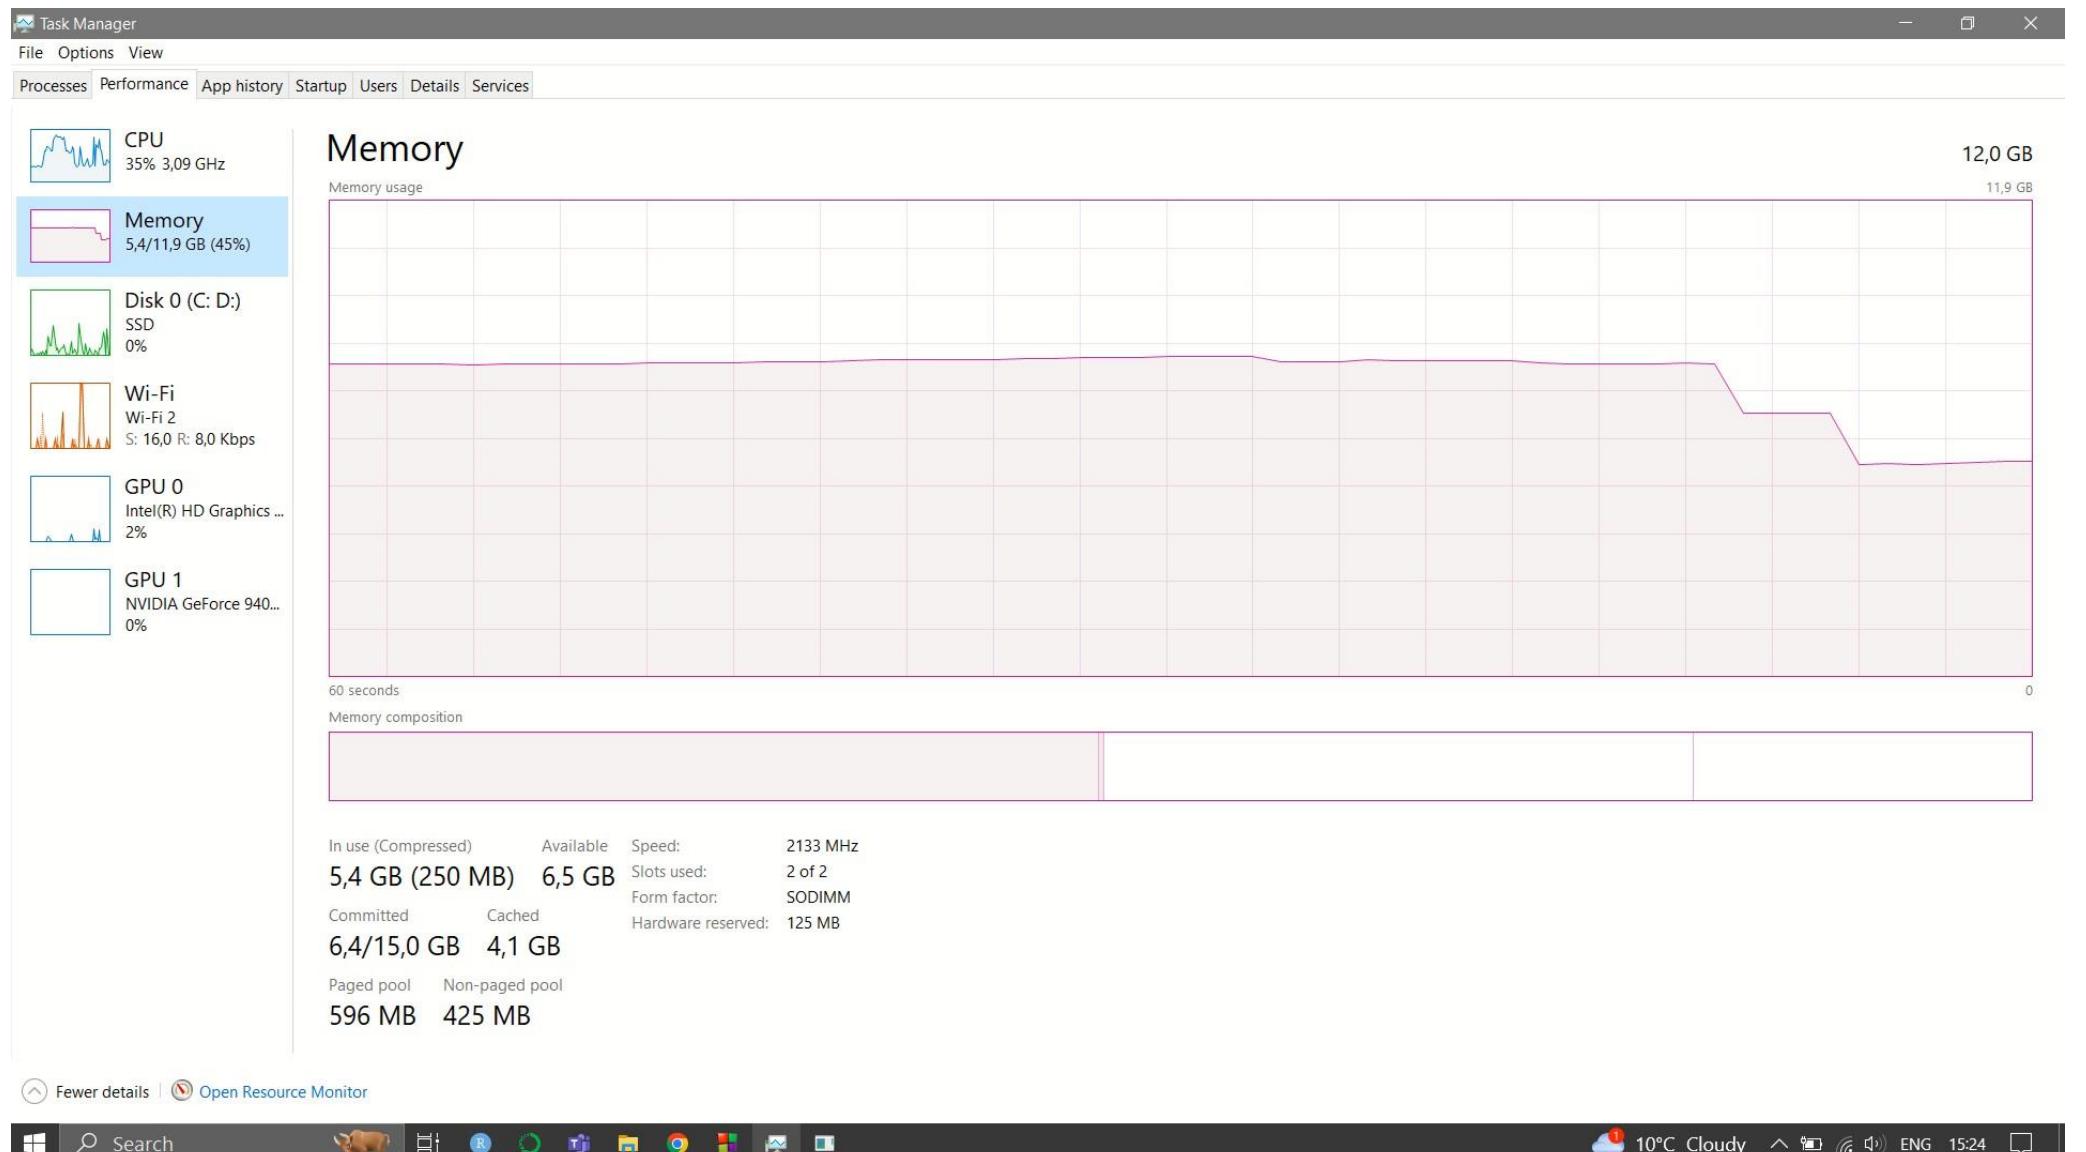

I startegija, failas su 1000000 studentų naudojant std::list

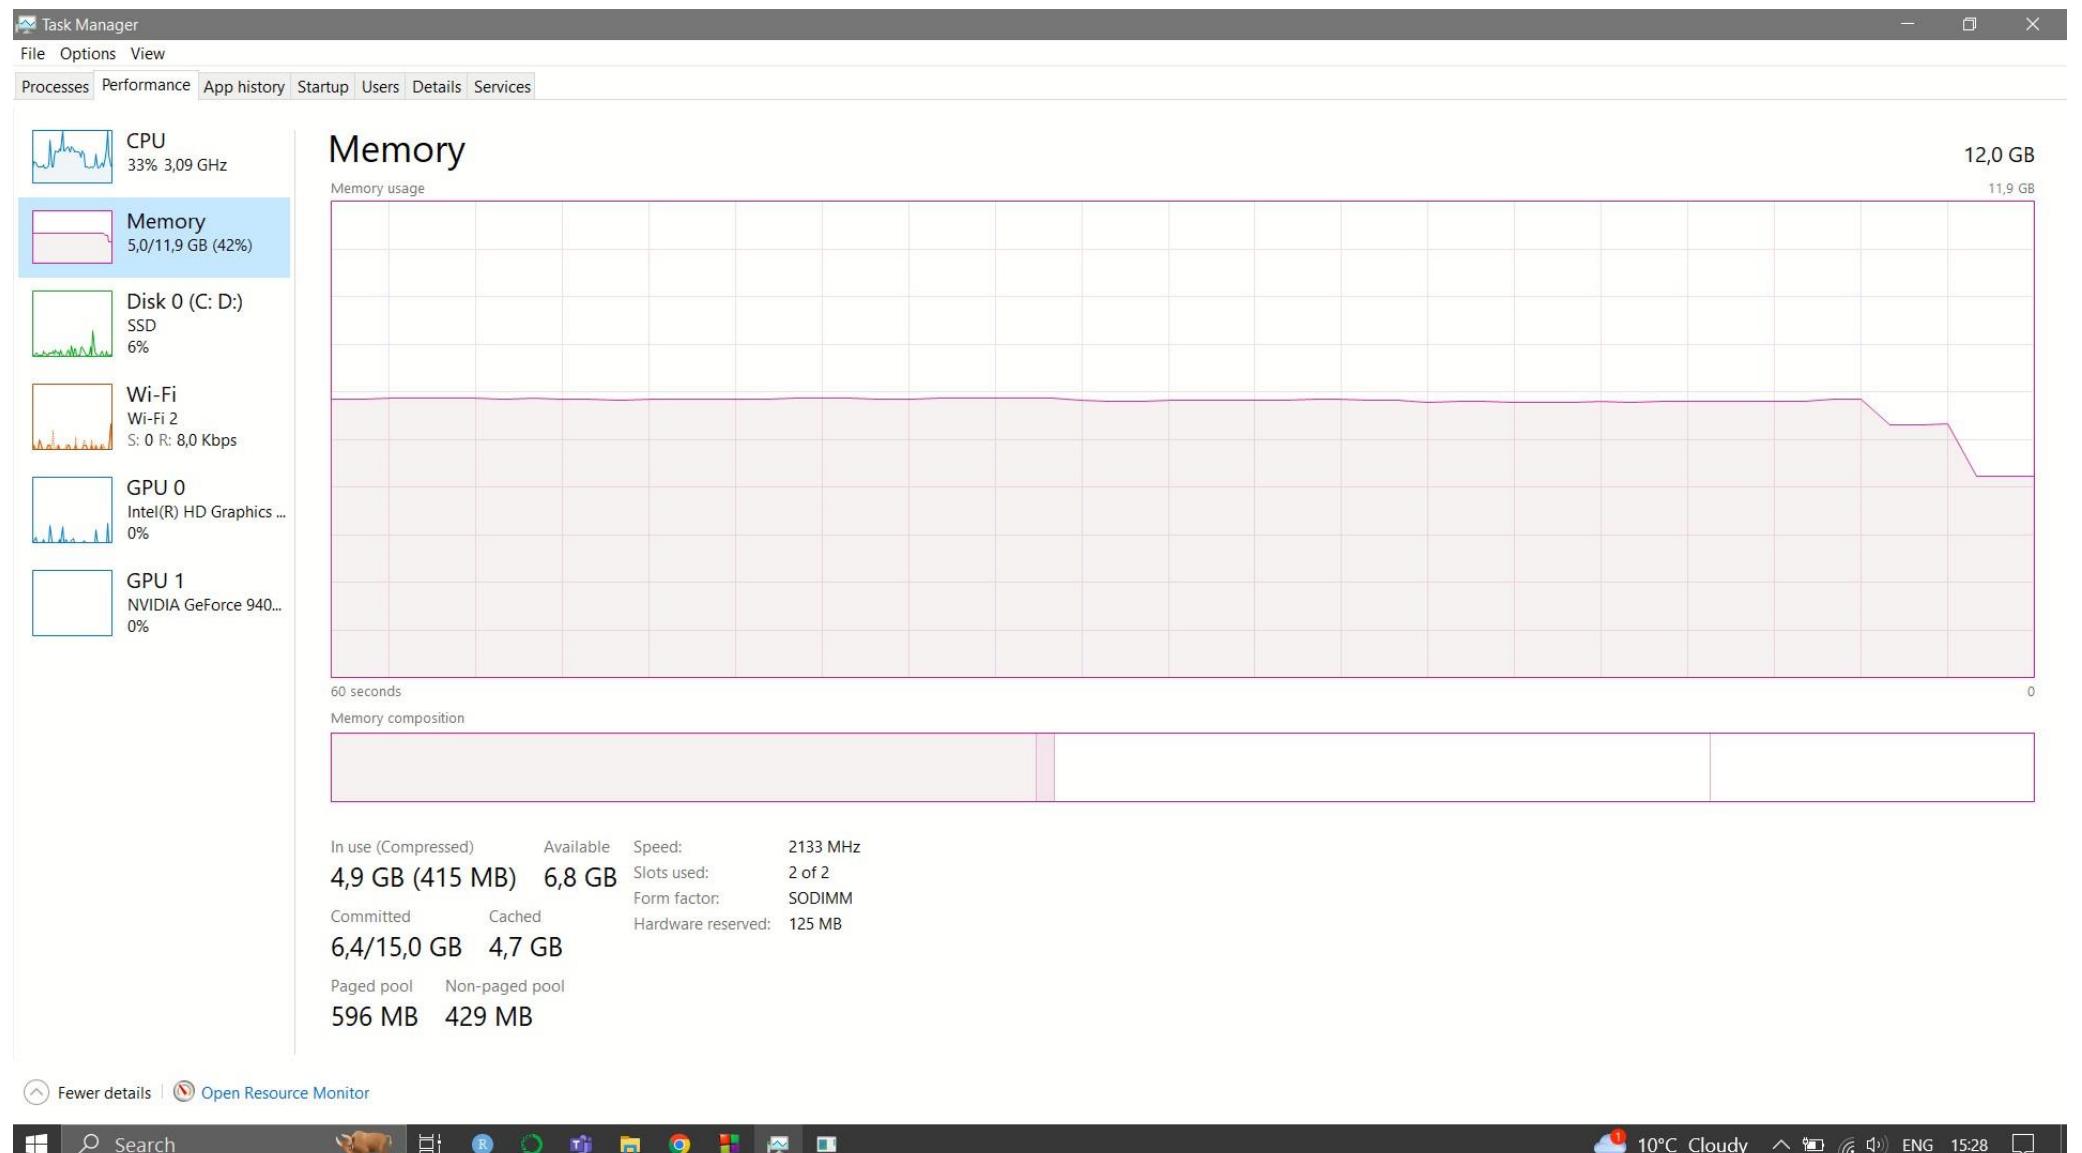

II startegija, failas su 1000000 studentų naudojant std::list

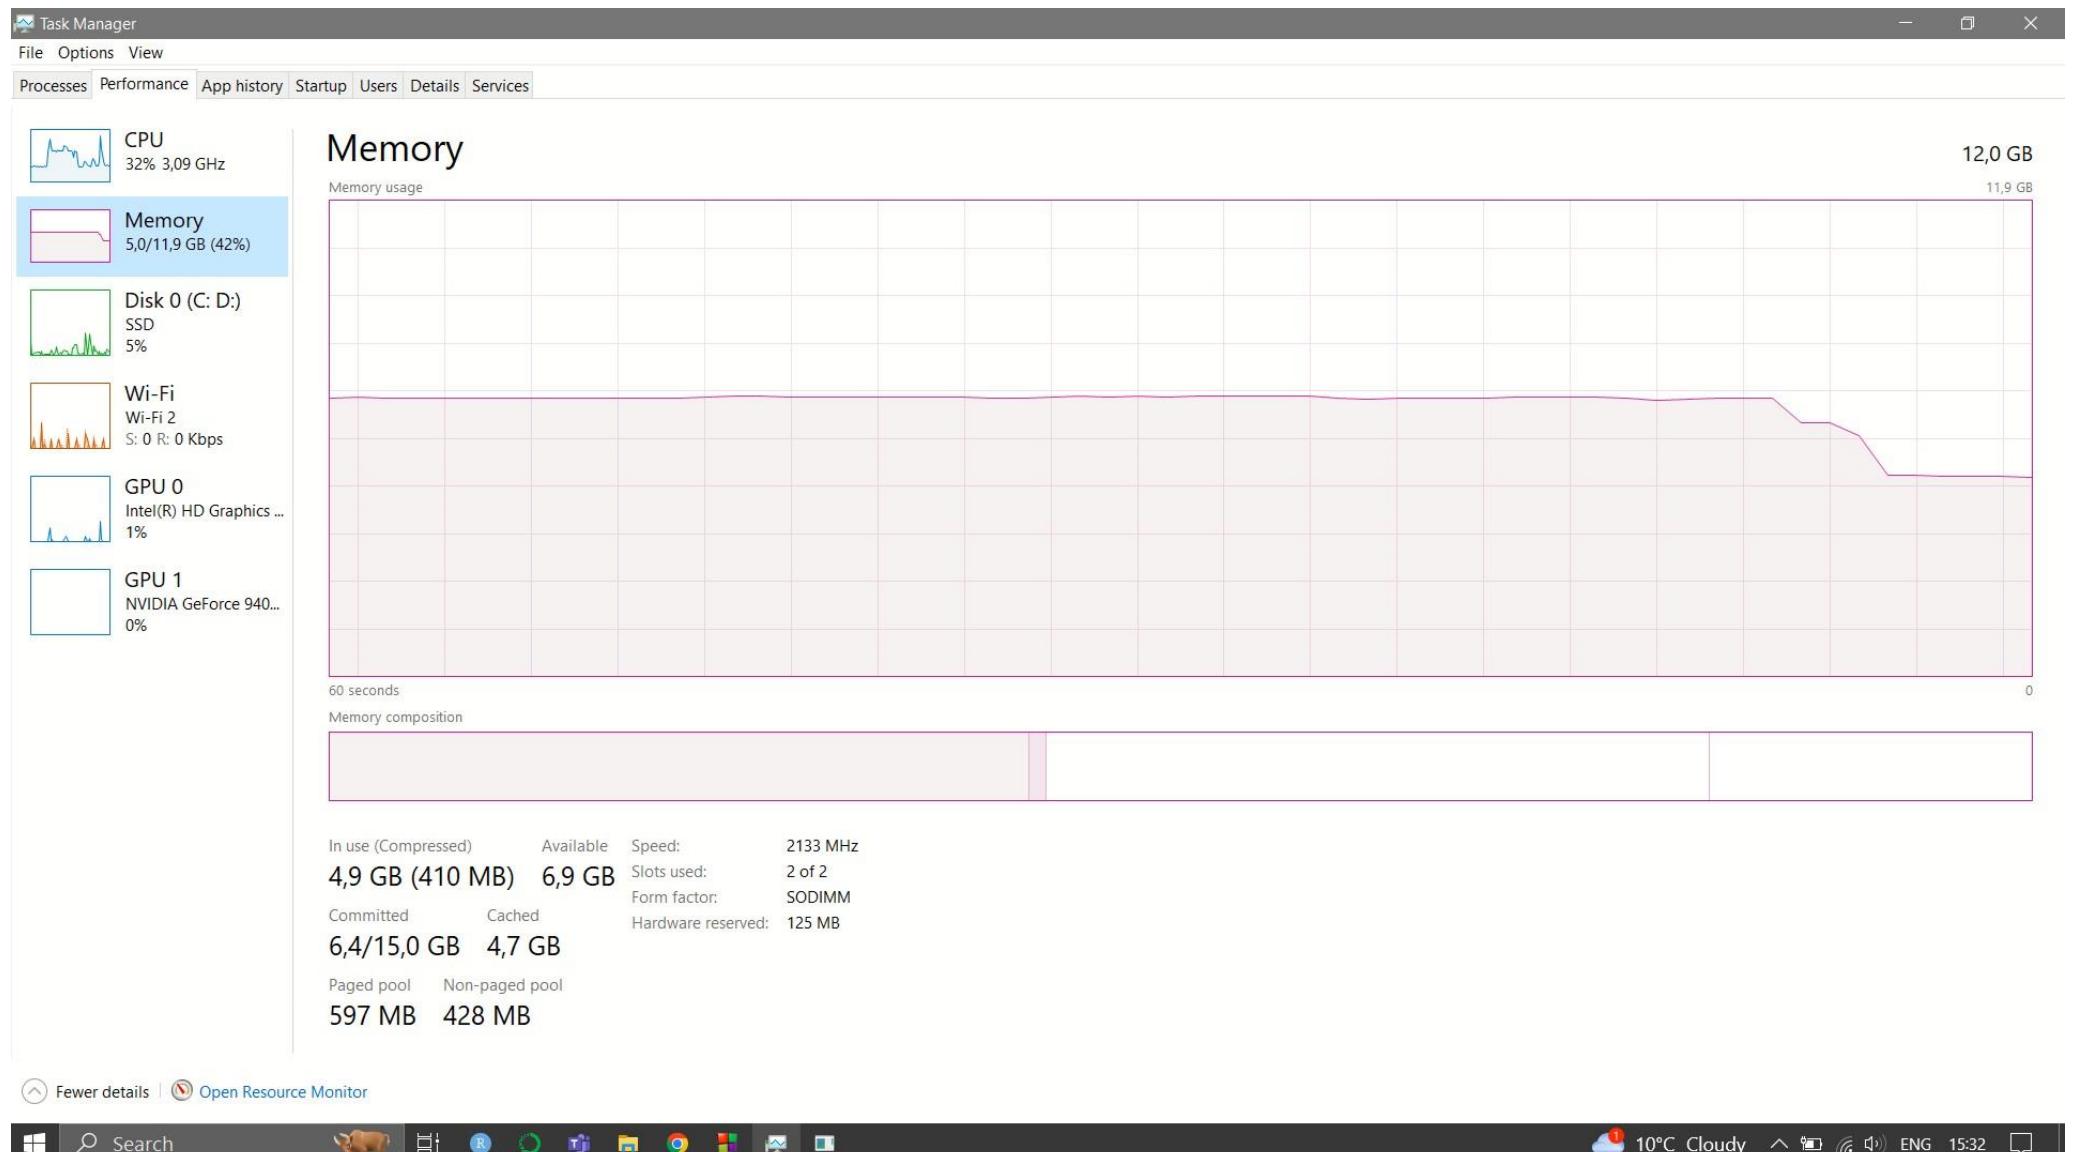

III startegija, failas su 1000000 studentų naudojant std::list

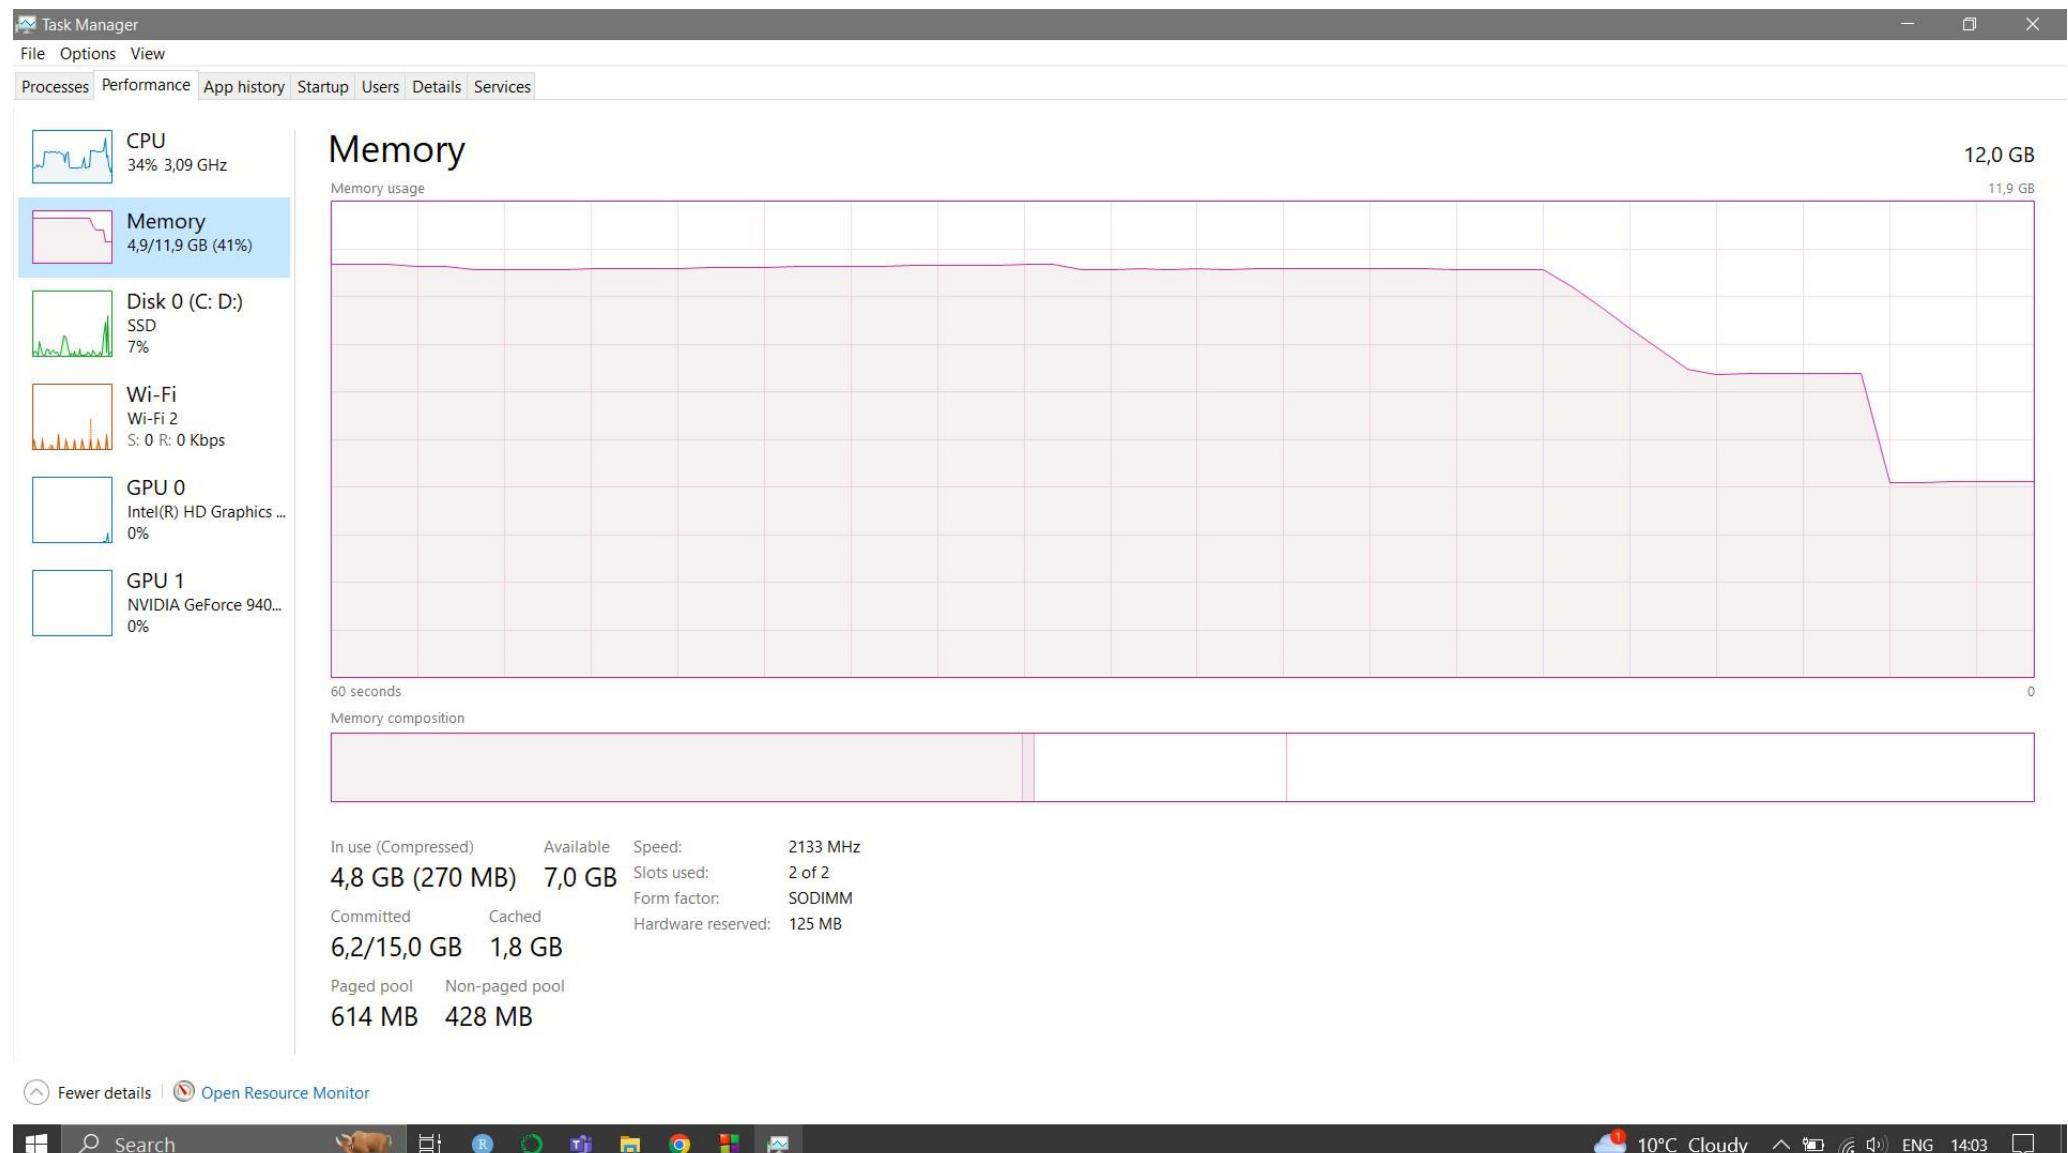

I startegija, failas su 10000000 studentų naudojant std::vector

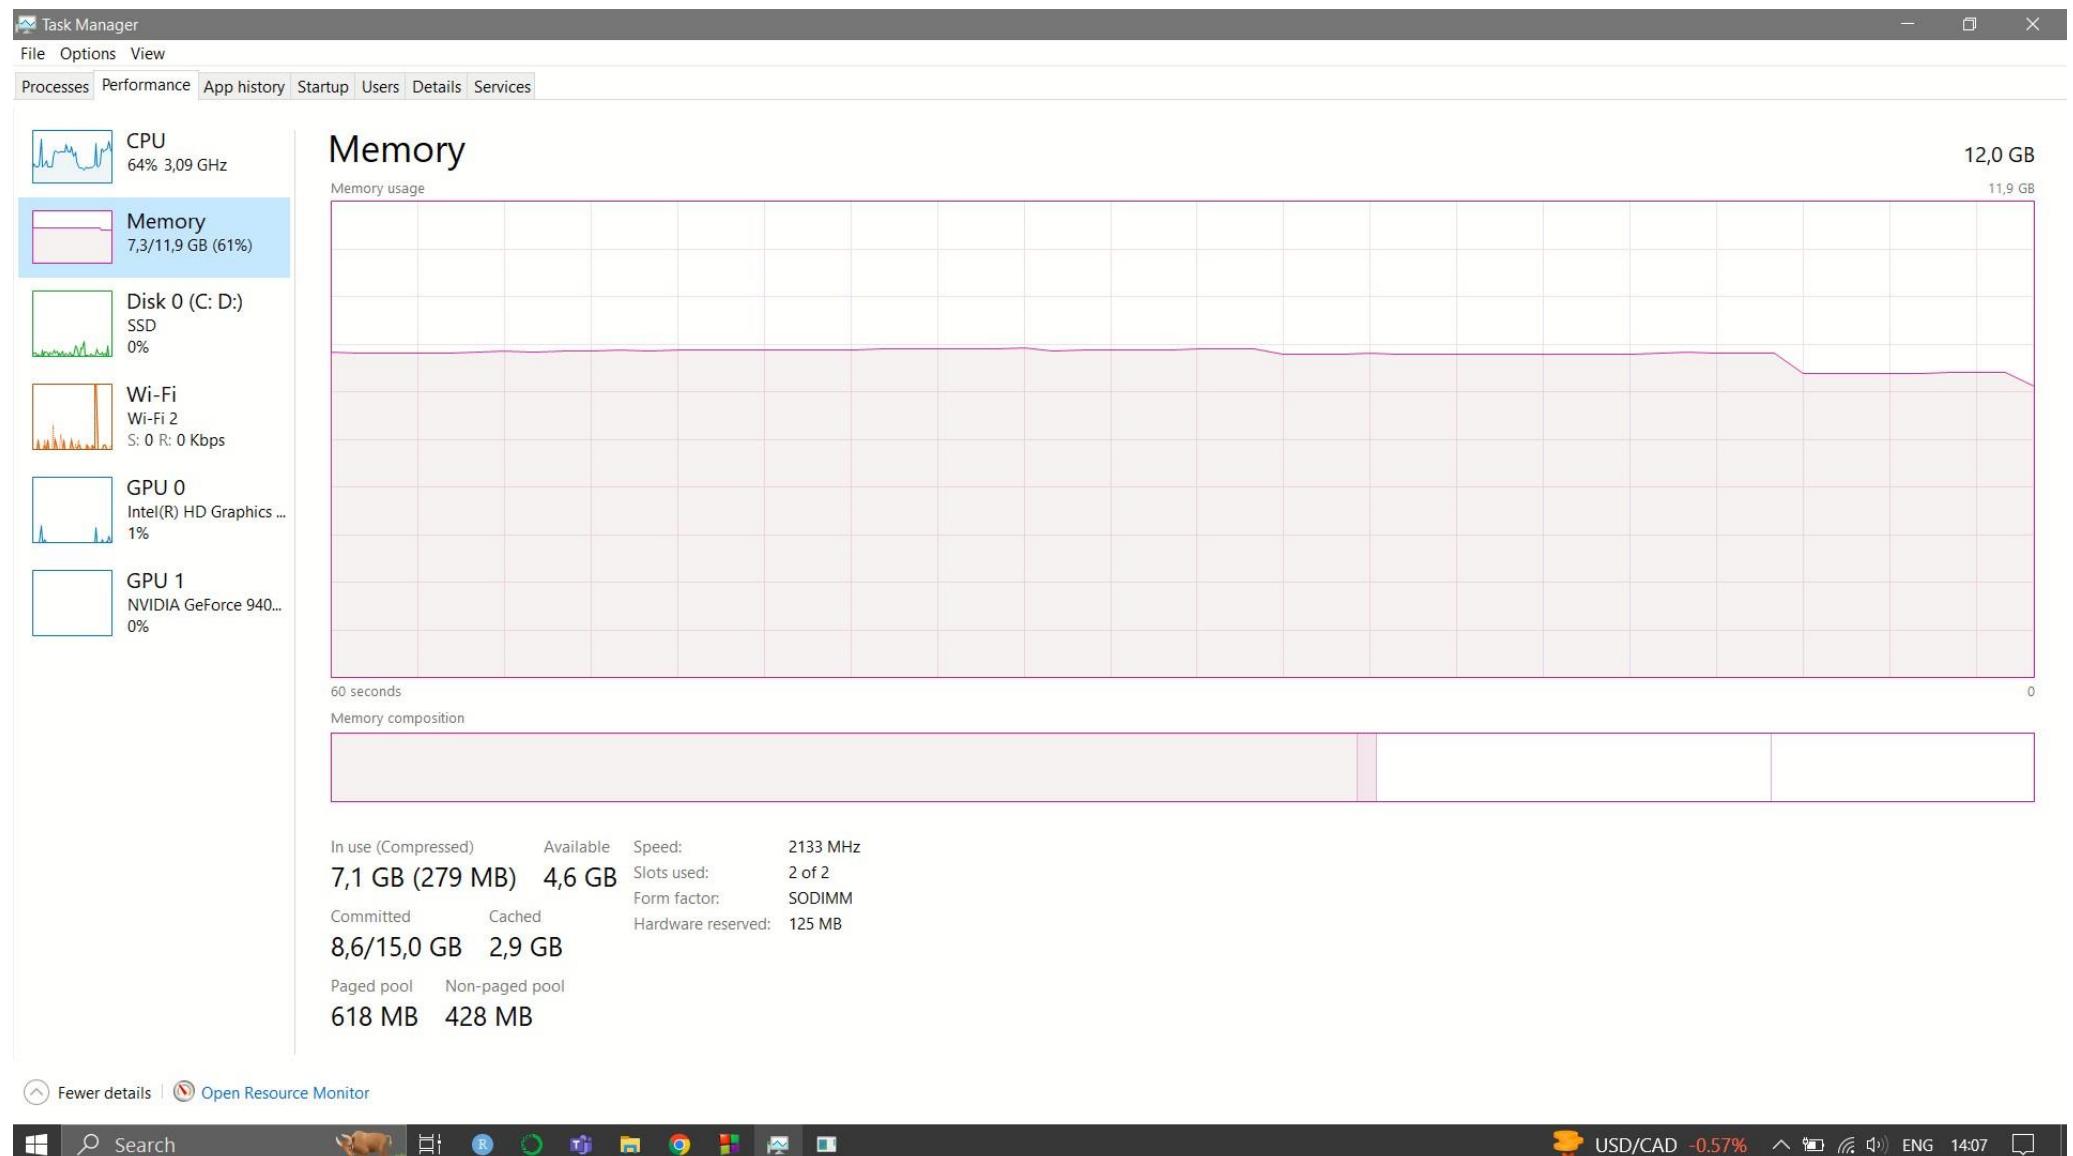

II startegija, failas su 10000000 studentų naudojant std::vector

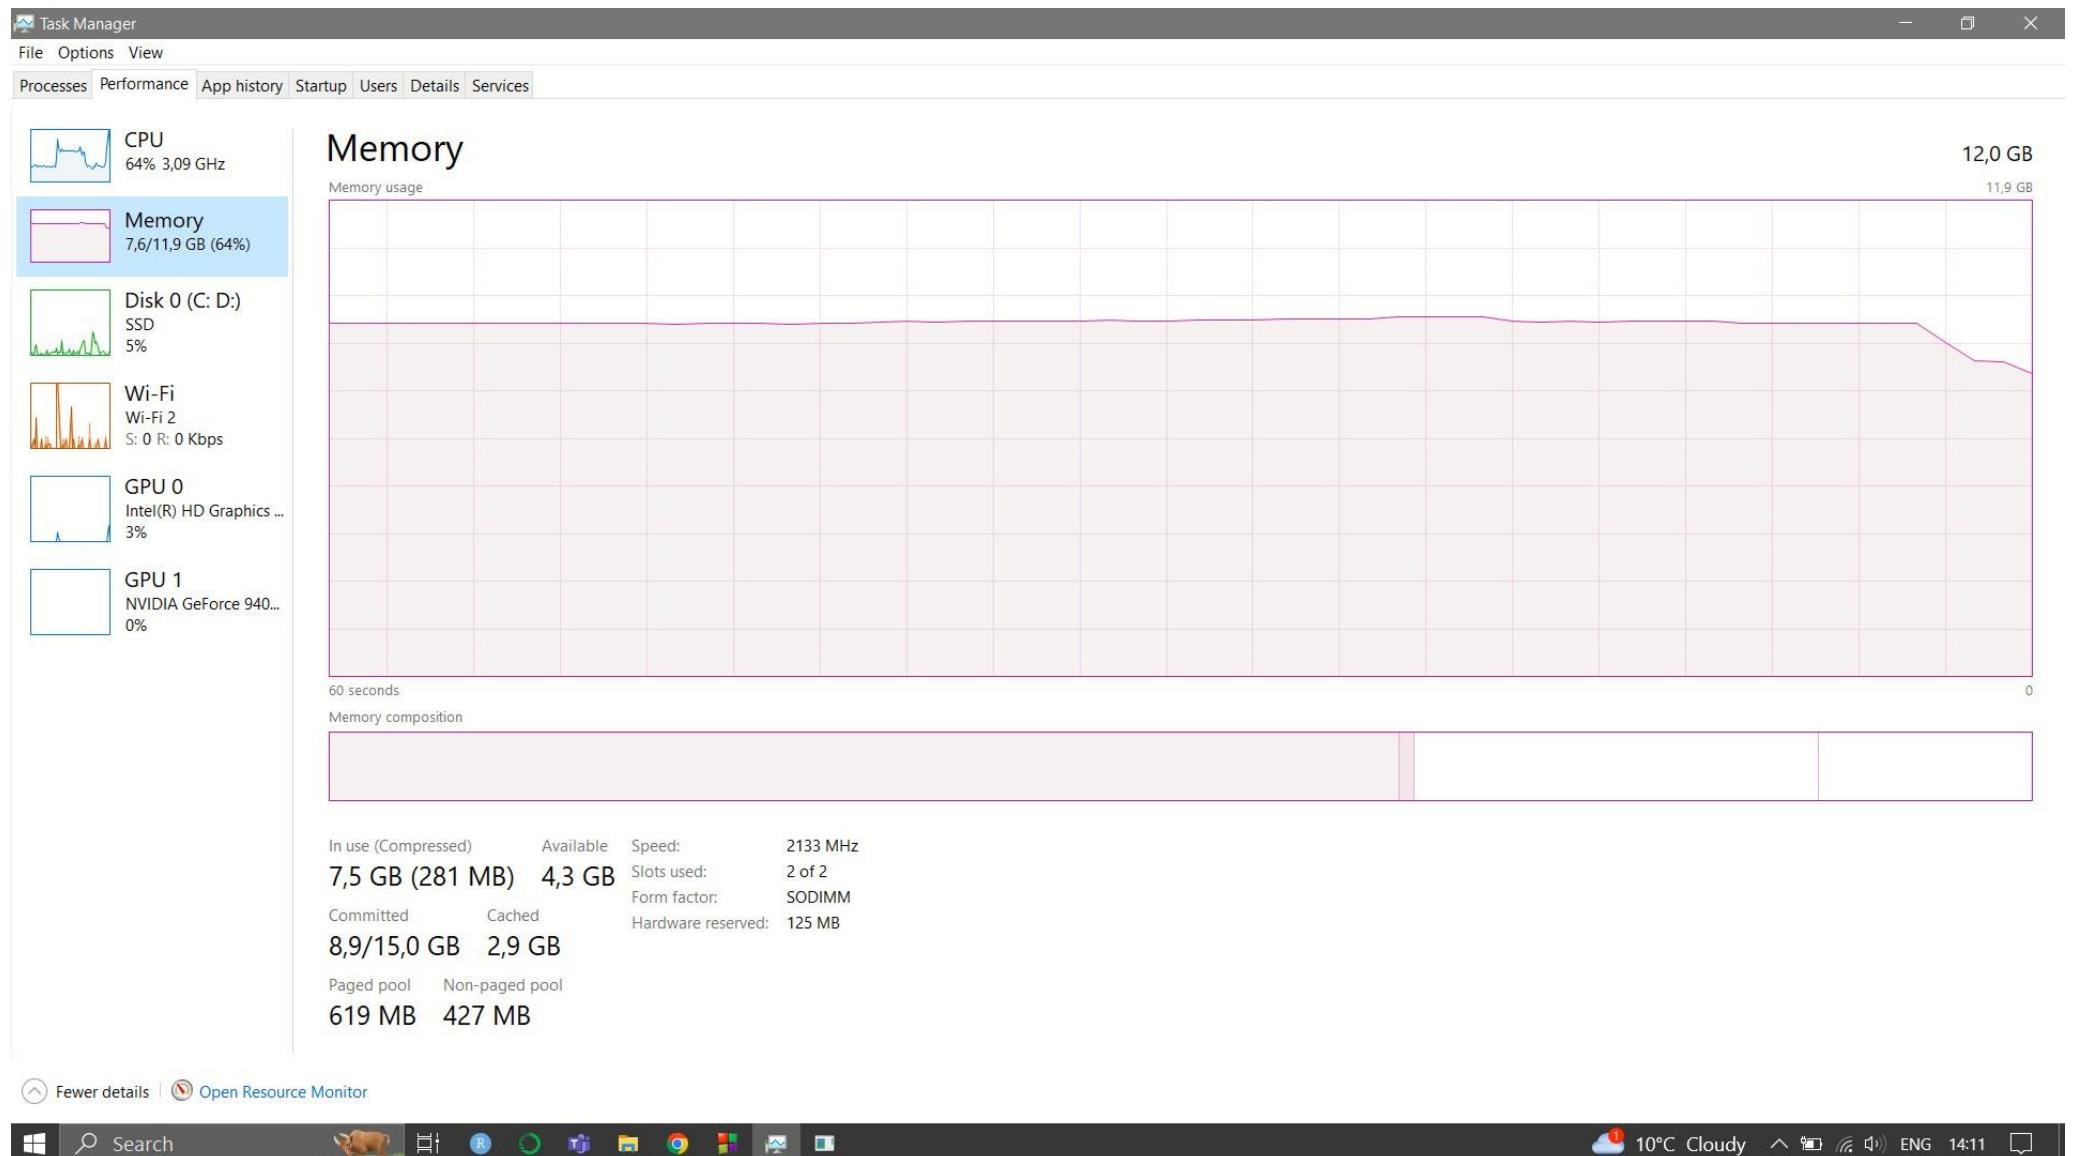

III startegija, failas su 10000000 studentų naudojant std::vector

I startegija, failas su 10000000 studentu naudojant std::list

II startegija, failas su 10000000 studentų naudojant std::list

III startegija, failas su 10000000 studentų naudojant std::list
